### 7.1 DISORDERS OF SEX DEVELOPMENT (DSD)

Q52.9/ Q55.9

#### DESCRIPTION

The current terminology for neonates or children presenting with incomplete differentiation of the external genitalia is "disorder of sex development".

#### DIAGNOSTIC CRITERIA

##### Clinical

- DSDs present with one or more of the following:
  - > varying degrees of hypospadias,
  - > maldescent of one or both gonads,
  - > atypical size of the phallus,
  - > scrotalisation of the labia, and
  - > a urogenital sinus.
- Isolated hypospadias is not a DSD.

Suspect congenital adrenal hyperplasia in an infant with non-palpable gonads and DSD.

##### Investigations

- Urgent urea/electrolytes, venous blood gas and blood glucose to identify possible adrenal insufficiency.
- Elevated 17-hydroxyprogesterone level to confirm a diagnosis of adrenal hyperplasia (to be done after day 3 of life for an accurate interpretation of the result).
- Further investigations (in discussion with referral centre):
  - > Genitourinary imaging (e.g. ultrasound).
  - > Genetic evaluation.

#### GENERAL AND SUPPORTIVE MEASURES

- Gender assignment in these infants should only be undertaken after extensive counselling and evaluation by a multidisciplinary team.
- Stabilise all neonates suspected of having congenital adrenal hyperplasia with a salt-losing crisis prior to urgent referral, as a crisis may be life threatening.

## **Chapter 8 Lab Investigation Endocrine System G W Learning:**

Hormones and Aging related diseases Girish Kotwal, Rossella Cannarella, Sri Prakash Mokshagundam, Amod Kulkarni, 2026-03-24 Aging and its associated changes in the human body have always been equally fascinating amongst evolutionary scientists, healthcare researchers, and physicians. Dinosaurs, as per the recent longevity bottleneck hypothesis, influenced rapid aging and associated problems in mammals, including humans. This rapidly aging demographic in humans and declining birth rates are expected to result in a growing aging population across the globe. This rapid graying will reach a new milestone by 2034 where the population size of individuals aged above 65 will outnumber children in many countries. This older population is estimated to be racially and ethnically more diverse, particularly in the USA. The increasing number of aged individuals will bring the global shift in the healthcare needs of the aging population. The recent COVID-19 pandemic has further added to the complexities of the etiology of geriatric disorders. To understand and address the unmet needs of our aging population, the complex physical and biological changes in the geriatric population should be understood. Hormones are the most powerful molecules in the human body and govern every biochemical process, from cognition, metabolism, excretion, reproduction, to other physical and biological processes. The level of different hormones changes with aging. While aging affects populations across the globe, it affects races, ethnicities, and genders differently. These gender-wise differences in ethnicities across the globe might be attributed to differences in the levels of hormones. These changes in the levels of hormones may not necessarily always be harmful. It is both relevant and important to discuss which changes are beneficial and which can impact human health. Furthermore, chronic disease burden and multi-morbidity varies amongst non-Hispanics, Hispanics, whites, other ethnicities, and differ in genders. The similarities and differences in different populations, both at the disease and hormonal level, will certainly help in understanding the healthcare challenges and unmet needs of the diverse aging population. This Research Topic will focus on the similarities and differences in the levels of hormones across demographics, races, ethnicities, and genders. Both the beneficial and harmful impact of hormones in the normal aging population and in geriatric disorders will be the key areas of focus to address the unmet healthcare challenges. In addition, we welcome contributions that provide an overview of supplements, natural, innovative, and affordable healthcare solutions on the market, and research in aging will be included. The aim of this Research Topic is to provide a discussion platform for researchers, physicians, and healthcare providers for developing affordable solutions to treat hormonal disorders in our rapidly graying diverse population. The impact of COVID-19 on hormonal changes and disorders in our geriatric population will also be discussed. This Research Topic welcomes Original Research articles, Mini-Reviews, and Reviews that provide insights into the current state of management of aging-related hormonal abnormalities and commentaries. Potential areas of discussion include but are not limited to the following topics: 1. The effects of healthy versus unhealthy aging on endocrine function, potential disparities in these measures related to age, gender, race, and ethnicity. 2. Influence of COVID-19 and post

acute sequelae of SARS CoV 2 infection PASC on the outcome of endocrine functions in aging individuals across genders races and ethnicities 3 Hormonal imbalance and age associated dementia in women 4 Hormones in oncology disorders in aging population from diagnostic markers to key therapeutic targets 5 Treatment of metastasized neuroendocrine tumor with Somatuline and Nutraceuticals to minimize tumor spread and growth 6 Adverse effects of using synthetic hormones such as leuprolide Lupron to significantly reduce testosterone levels to slow prostate cancer growth 7 Current research on endocrine disruptors ghrelin kisspeptin and fabkin in aging population and disorders 8 Hormones and Aging related disorders affecting the heart circulatory hypertension dyslipidemia thyroid or kidneys and conditions that emerge with aging such as orthopedic disorders and sleep disorders 9 Novel therapeutic interventions including gene cell based extracellular vesicles nutrition biosimilars

## **Chapter 8 Lab Investigation Endocrine System G W Learning Introduction**

In the digital age, access to information has become easier than ever before. The ability to download Chapter 8 Lab Investigation Endocrine System G W Learning has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Chapter 8 Lab Investigation Endocrine System G W Learning has opened up a world of possibilities. Downloading Chapter 8 Lab Investigation Endocrine System G W Learning provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Chapter 8 Lab Investigation Endocrine System G W Learning has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Chapter 8 Lab Investigation Endocrine System G W Learning. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Chapter 8 Lab Investigation Endocrine System G W Learning. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Chapter 8 Lab Investigation Endocrine System G W Learning, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Chapter 8 Lab Investigation Endocrine System G W Learning has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers,

free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
