1.1 Introductory Note

Our **ability to communicate** and the different forms our communication takes are very often **taken for granted**. The communication process is **fundamental for human survival**. Their aim was to measure **the amount of information, in the mess ages, that is transmitted through the media on the telephone**; however, as years passed by, inter-disciplinary approaches to study human communication came up. *They rely on psychology, sociology, speech communication, political, journalism, anthropology management, education, marketing and philosophy*. Thus, we can say that every discipline concerned with human behavior must deal with communication.

The question here is
