Diagrammatic Representation and Inference Alan Blackwell, Kim Marriott, Atsushi Shimojima, 2004-07-16 Although diagrammatic representations have been a feature of human communication from early history recent advances in printing and electronic media technology have introduced increasingly sophisticated visual representations into everyday life We need to improve our understanding of the role of diagrams and sketches in communication cognition creative thought and problem solving These concerns have triggered a surge of interest in the study of diagrammatic notations especially in academic disciplines dealing with cognition computation and communication We believe that the study of diagrammatic communication is best pursued as an interdisciplinary endeavor The Diagrams conference series was launched to support an international research community with this common goal After successful meetings in Edinburgh 2000 and Georgia 2002 Diagrams 2004 was the third event in the series The Diagrams series attracts a large number of researchers from virtually all academic fields who are studying the nature of diagrammatic representations their use in human communication and cognitive or computational mechanisms for processing diagrams By combining several earlier workshop and symposium series that were held in the US and Europe Reasoning with Diagrammatic Representations DR US Thinking with Diagrams TWD Europe and Theory of Visual Languages TVL Europe Diagrams has emerged as a major international conference on this topic

IJCAI-99 Thomas L. International Joint Conference on Artificial Intelligence** ,1999 Encyclopaedia of Mathematics Michiel Hazewinkel,2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main

directions in mathematics where a rather fine subdivision has been used. The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible. On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science, engineers and teachers of mathematics. These articles treat their material at a fairly general level and aim to give an idea of the kind of problems, techniques and concepts involved in the area in question. They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions. The second kind of article of medium length contains more detailed concrete problems, results and techniques.
