NAME OF STUDENT: ROUIL E. ASOK

1. Explain how knowledge of managerial accounting can assist a manager with regard to the following concerns:
  - a. He is deciding whether to push through with a project.  
*TO decide, the manager should make an estimate of the project cost using his knowledge gained from managerial accounting. In case the project returns are higher than the costs, then he can proceed with the project.*
  - b. He is determining whether a branch is profitable or not.  
*The manager will assess the break-even analysis to determine the fixed and variable costs for each region then select the one with a higher contribution margin which will guarantee profitability.*
  - c. He is deciding whether to process a certain product further before selling. *The manager has to conduct process costing and cost allocation in order to identify which product is more profitable or not. The strategy using "make or buy" can also be considered and the companies will choose the best option based on the most profitable product.*
  - d. He would like to show to the Board of Directors how the business is financially performing and how cash is being used.  
*The business is said to be excellent in terms of financial performance when the revenues are higher than the costs with a good level of liquidity. The cash usage can be shown through the cash budget on how the amounts of money are being spent on various items. This information can then be used as support for his presentation to the Board of Directors.*
