Successful Project Sponsorship Michiel van der Molen, 2015-09-03 Project success is a business management responsibility and project management is more than the work of a project manager; the project sponsor plays a key role, whatever their job title. As the owner of the business case, the project sponsor or project executive has the responsibility for communicating the aims of the project, staying in touch with the changing environment, and ultimately using their leadership skills to realize the benefits that the project has set out to achieve. The project sponsor gives strategic direction to the project manager and empowers them to deliver the agreed result. However, as a busy business manager balancing the role of project executive with other management responsibilities, the project sponsor wants more control for less effort. The four proven principles in *Successful Project Sponsorship* help them to achieve precisely that. This book leads the reader to success through the powerful and proven four principles of successful project sponsorship. These principles are all focused on giving strategic direction to projects effectively and efficiently. Instead of going into depth on project management theory and methodologies, this book answers the practical questions project sponsors have to tackle and provides targeted solutions to real-life issues such as: How do I create a successful strategy? How do I keep a project under control when the requirements are changing? What can I do to keep the project on budget? How do I recognize a good project manager and how do I deal with an out-of-control one? The final part of the book gives tried and tested practical guidance on how to improve project sponsorship knowledge within your organization. Written clearly and

concisely for the busy executive in line with the PMI s Lexicon of Project Management Terms and with special tips for Prince2 environments and agile projects this highly practical guide is the essential toolkit all business managers need to make a success of their project sponsor role

PMP Certification: Excel with Ease 2/e Subramanian Chandramouli,2013

Integrating Artificial and Human Intelligence through Agent Oriented Systems Design Michael E. Miller,Christina F. Rusnock,2024-08-28

This book departs from the assumption that Artificial Intelligence AI systems will provide a maximum advantage by replacing human cognitive processing Instead this book subscribes to the assumption that AI systems will provide a maximal advantage when the system is specifically designed to augment human intelligence It provides methods for designing effective systems that include one or more humans and one or more AI entities and uses the approach that assumes automation does not replace human activity but fundamentally changes the structure of human work when AI is added to existing systems

Integrating Artificial and Human Intelligence through Agent Oriented Systems Design discusses the potential impact of AI on human work and life and explores why teamwork is necessary today for complex work environments The book explains the processes and methods humans employ to effectively team with one another and presents the elements of artificial agents that permit them to function as team members in joint human and artificial teams It discusses design goals and illustrates how the methods that have been used to model the complex interactions among human and artificial agents can be expanded to enable the design of interaction between them to make possible the attainment of the shared goals

Model Based Systems Engineering MBSE tools that provide logical designs of human agent teams the AI within these teams training to be deployed for human and artificial agent team members and the interfaces between human and artificial agent team members are all covered

MBSE files containing profiles and examples for building MBSE models used in the design approach are featured on the author s website <https://loderterresci.com> hat This book is an ideal read for students professors engineers and project managers associated with designing and developing AI systems or systems that seek to incorporate AI
