practitioner Bill Griffith Jr CFP people are faced with having to make serious decisions about how to manage their company retirement plan how much to contribute how to invest their money and what to do with their vested balance after they retire They need to have a plan based on clear and accurate information to help them make decisions about when to retire how long they can expect to live in retirement how much they need to accumulate and how to manage their funds throughout their retirement years The investment needed to finance retirement depends on an accurate forecast of expenditures and rate of return assumptions well into the future The uncertainty of traditional return assumptions and rising healthcare costs are both significant risks in retirement and can have a tremendous impact on retirement savings and security Decisions about when to retire how long you can expect to live in retirement and how much you need to accumulate are complicated by an ever changing set of circumstances Throughout this book the author emphasizes a process driven approach for facing these and other critical issues in retirement You will learn about the proper methods for managing retirement funds and how to protect against the risk of funding long term liabilities Meeting financial obligations through an investment based approach is only one part of the process Securing a Retirement Income for Life will show you how to use a combination of methods to assure that your retirement income will last for life
