begins with the programming of objects in general and the basics of the ABAP language that a developer needs to know to get started. The most important topics needed to perform daily support jobs and ensure successful projects are covered. ABAP is a vast community with developers working in a variety of functional areas. You will be able to apply the concepts in this book to your area. SAP ABAP Objects is goal directed rather than a collection of theoretical topics. It doesn't just touch on the surface of ABAP objects but goes in depth from building the basic foundation e.g. classes and objects created locally and globally to the intermediary areas e.g. ALV programming, method chaining, polymorphism, simple and nested interfaces and then finally into the advanced topics e.g. shared memory, persistent objects. You will know how to use best practices to make better programs via ABAP objects.

**What You'll Learn**  
Know the latest advancements in ABAP objects with the new SAP Netweaver system.  
Understand object oriented ABAP classes and their components.  
Use object creation and instance methods calls.  
Be familiar with the functions of the global class builder.  
Be exposed to advanced topics.  
Incorporate best practices for making object oriented ABAP programs.

**Who This Book Is For**  
ABAP developers, ABAP programming analysts and junior ABAP developers.  
Included are ABAP developers for all modules of SAP, both new learners and developers with some experience or little programming experience in general, students studying ABAP at the college/university level, senior non-ABAP programmers with considerable experience who are willing to switch to SAP ABAP and any functional consultants who want or have recently switched to ABAP.
