SQL Power! Kenneth Hess, 2007. If you're an aspiring database administrator, you need to learn SQL quickly to advance in your career. SQL Power: The Comprehensive Guide provides just the data you need to go from novice to master by immersing you in real life database design, implementation and administration situations. The book is equally useful for those already experienced with databases and SQL who want to increase their knowledge without having to sift through a tome. Beginning with an overview of SQL and the concept of relational databases, the book goes on to cover all the major topics including tables, primary keys, relationships, foreign keys, MySQL and database software, as well as the data definition, data manipulation and data control languages. Later chapters cover higher level topics such as advanced queries, virtual tables, normalization and embedded SQL. The book's examples build upon one another with end of chapter exercises that test your knowledge as you go. All of the source code used in the book is available for download at www.courseptr.com/downloads.

Server-Side Flash William B. Sanders, Mark Winstanley, 2001-07-15. Server Side Flash: Scripts, Databases and Dynamic Development fills an important gap in the Flash book market. With the emergence of e-commerce, no Web site is complete without a back end because the back end is the virtual sales connection. Likewise, complex games are dependent on access to huge sets of data that can be sent in small packages but getting them in and out of Flash requires knowing how the data can be generated in Flash, how it can be sent out to the servers and how it gets information back from the servers and integrates it into the ongoing game. While every book on Flash recognizes this new capacity to some extent, none of them have really showed developers how to get the data into and out of Flash and use it effectively. Server Side Flash gives developers the tools to fully utilize Flash's capacity to

communicate with the server side of the Web PHP MySQL have over half a million users ASP has at least as many and just about every professional Web page now contains at least some JavaScript Find out how Flash communicates with these other languages and servers with coverage of the use of Macromedia s powerful database Flash product Generator and put its use in context with other Flash database techniques and applications
