Making Sense of Change Management Esther Cameron, Mike Green, 2019-11-03 This definitive bestselling text in the field of change management provides comprehensive guidance of everything needed to successfully navigate times of change. Making Sense of Change Management provides a thorough and accessible overview for students and practitioners alike. Without relying on assumed knowledge, it comprehensively covers the theories and models of change management and connects them to workable approaches and techniques that organizations of all types and sizes can use to adapt to tough market conditions and succeed by changing their strategies, structures, mindsets, leadership behaviours, and expectations of staff and managers. This completely revised and updated fifth edition contains new chapters on digital transformation and becoming a sustainable business, new material on resilience, well-being, and effective leadership, and new examples from organizations including Google, Burberry, and Volvo. Supported by food for thought and stop and think features to aid critical thinking and understanding, as well as checklists, tips, and helpful summaries, Making Sense of Change Management remains essential reading for anyone who is currently part of or leading a change initiative. New and updated accompanying online resources include international case study question packs for lecturers and lecture slides with reflective questions.

Biomedical Engineering Applications for People with Disabilities and the Elderly in the COVID-19 Pandemic and Beyond Valentina Emilia Balas, Oana Geman, 2022-06-18 Biomedical Engineering Applications for People with Disabilities and the Elderly in the COVID-19 Pandemic and Beyond presents biomedical engineering applications used to manage people's disabilities and care for the elderly to improve their quality of life and extend life expectancy. This edited book covers all aspects of assistive technologies, including the Internet of Things (IoT), telemedicine, e-Health, smart sensors, robotics, devices for rehabilitation, and serious games. This book will prove useful for bioengineers, computer science undergraduate and postgraduate students, researchers, practitioners, biomedical engineering students, healthcare workers, and medical doctors. This volume introduces recent advances in biomaterials, sensors, cellular engineering, biomedical devices, nanotechnology, and biomechanics applied in caring for the elderly and people with disabilities. The unique focus of this book is on the needs of this user base during emergency and disaster situations. The content includes risk reduction, emergency planning, response, disaster recovery, and needs assessment. This book offers readers multiple perspectives on a wide range of topics from a variety of disciplines. This book answers two key questions: What challenges will the elderly and people with disabilities face during a pandemic? How can new or emerging advances in biomedical engineering help with these challenges? Includes coverage of smart protective care tools, disinfectants, sterilization equipment, and equipment for rapid and accurate COVID-19 diagnosis. Focuses on the limitations and challenges faced by the elderly and people with disabilities in pandemic situations, such as limitations on leaving their homes and having caregivers and family visit their homes. How can technology help? Discusses tools, platforms, and techniques for managing patients with COVID-19. **Innovation Pathways to**
