Contemporary Task-Based Language Teaching in Asia Michael Thomas,Hayo Reinders,2015-02-26 Over the last decade task based approaches to language learning and teaching TBLT have become a global focus of increased levels of research Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result This book focuses on Asia where this shift has been particularly in evidence TBLT has often been implemented in top down approaches to curriculum development

which presents a huge range of challenges at the cultural as well as the pedagogic level Contemporary Task Based Language Teaching in Asia looks at the drivers stakeholders and obstacles across the region Some countries have adapted TBLT to deal with the local constraints others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts This collection is important to all involved in language development from curriculum reform to materials development It assists from programme evaluation to the setting of assessment standards The chapters cover all aspects of language education across Asia from primary to tertiary private and public education as well as innovations at local regional and national levels **Exploring Silences in the Field of Computer Assisted Language Learning** Anwar Ahmed,2022-07-09 This book is an attempt to pay deliberate attention to some silences on issues of social cultural and political importance that have remained unattended in the field of Computer Assisted Language Learning CALL Using an analytical framework developed by the French philosopher and cultural theorist Michel de Certeau the author demonstrates how silences can actively shape the boundaries of a scholarly field He argues that a geography of the forgotten in the field of CALL undermines the transformative and social justice potential of language teaching by using digital technologies The book will appeal to graduate students teacher educators and academic researchers who are looking for fresh perspectives and innovative ideas for integrating technologies into the curriculum and pedagogy of language education
