Design of Contemporary Inland Waterway Vessels Dejan Radojčić,Aleksandar Simić,Nikola Momčilović,Milorad Motok,Benjamin Friedhoff,2021-07-06 Inland Waterway IW or river vessels are in every respect different from the seagoing ships The professional literature is mostly focused on conventional seagoing fleets leaving a gap in the documentation of design practices for IW vessels The principal attribute that differentiates river vessels from the seagoing ships is the low or shallow draught due to water depth restrictions This book addresses key aspects for the design of contemporary shallow draught IW vessels for the transport of dry cargo containers and bulk cargo Most of the logic that is presented is applicable to the design of river vessels for any river but the material that is presented is focused on vessels for the River Danube and its tributaries The term contemporary river vessel assumes that the present day technology and current Danube river infrastructure are taken into consideration in its design It is believed that the technologies and concepts that are proposed here are applicable for all new vessel designs for the next 10 to 15 years Other innovative technologies should be considered for designs beyond that horizon Moreover nowadays contemporary IW vessel must be in harmony with the Environmentally Sustainable Transport EST policies and hence special attention is paid to both ecology and efficiency Note however that shipowners and ship operators usually tend to choose the conventional cost effective transport technologies Given that potential divergence of interests the concepts and technologies treated here may be regarded as innovative

Design, Control, Predict Aaron Shapiro,2020-12-15 An in depth look at life in the smart city Technology has fundamentally transformed urban life But today s smart cities look little like what experts had

predicted Aaron Shapiro shows us the true face of the revolution in urban technology taking the reader on a tour of today's smart city. Along the way he develops a new lens for interpreting urban technologies, logistical governance, to critique an urban future based on extraction and rationalization. Through ethnographic research, journalistic interviews, and his own hands-on experience, Shapiro helps us peer through cracks in the smart city's facade. He investigates the true price New Yorkers pay for free ad-funded WiFi, finding that it ultimately serves the ends of commercial media. He also builds on his experience as a bike courier for a food delivery startup to examine how promises of flexible employment in the gig economy in fact pave the way for strict managerial control. And he turns his eye toward hot button debates around police violence and new patrol technologies, asking whether algorithms are really the answer to reforming our cities' ongoing crises of criminal justice. Through these gripping accounts of the new technological urbanism, *Design Control Predict* makes vital contributions to conversations around data privacy and algorithmic governance. Shapiro brings much-needed empirical research to a field that has often relied on 10,000-foot views. Timely, important, and expertly researched, *Design Control Predict* doesn't just help us comprehend urbanism today; it advances strategies for critiquing and resisting a dystopian future that can seem inevitable.

Agricultural Value Chain Gokhan Egilmez, 2018-04-26 This book covers the agricultural value chain issues that occur in different parts of the world and aims to increase our understanding about the sustainable agricultural value chain paradigm. By reading through these chapters, the readers will witness various interesting, sometimes sad, commonalities among different regions of the world where smallholder farmers and producers are severely affected by various agricultural policy deficiencies or mistakes and inexistences. The book consists of 14 chapters which comprehensively cover over 20 agricultural products from more than 15 different regions of the world. Various qualitative and quantitative research methods are presented, including surveys, case studies, interviews, price transmission, risk analysis, and multiagent system technology.
