Research Anthology on Reliability and Safety in Aviation Systems, Spacecraft, and Air Transport Management Association, Information Resources, 2020-09-24 As with other transportation methods safety issues in aircraft can result in a total loss of life Recently the air transport industry has come under immense scrutiny after several deaths occurred due to aircraft design and airlines that allowed improperly inspected aircraft to fly Spacecraft too have found errors in system software that could lead to catastrophic failure It is imperative that the aviation and aerospace industries continue to revise and refine safety protocols from the construction and design of aircraft to secure and improve aviation systems and to test and inspect aircraft The Research Anthology on Reliability and Safety in Aviation Systems Spacecraft and Air Transport is a vital reference source that examines the latest scholarly material on the use of adaptive and assistive technologies in aviation to establish clear guidelines for the design and

implementation of such technologies to better serve the needs of both military and civilian pilots It also covers new information technology use in aviation systems to streamline the cybersecurity decision making planning and design processes within the aviation industry Highlighting a range of topics such as air navigation systems computer simulation and airline operations this multi volume book is ideally designed for pilots scientists engineers aviation operators air traffic controllers air crash investigators teachers academicians researchers and students *Intelligent Sensor Networks* Fei Hu,Qi Hao,2012-12-15 In the last decade wireless or wired sensor networks have attracted much attention However most designs target general sensor network issues including protocol stack routing MAC etc and security issues This book focuses on the close integration of sensing networking and smart signal processing via machine learning Based on their world class research the authors present the fundamentals of intelligent sensor networks They cover sensing and sampling distributed signal processing and intelligent signal learning In addition they present cutting edge research results from leading experts

Information Modelling and Knowledge Bases XXVII Tatjana Welzer,Bernhard Thalheim,Yasushi Kiyoki,Naofumi Yoshida,2016-02-15 Information modeling has become an increasingly important topic for researchers designers and users of information systems In the course of the last three decades information modeling and knowledge bases have become essential not only with regard to information systems and computer science in an academic context but also with the use of information technology for business purposes This book presents 29 papers selected and upgraded from those delivered at the 25th International Conference on Information Modelling and Knowledge Bases EJC 2015 held in Maribor Slovenia in June 2015 The aim of the conference is to bring together experts from different areas of computer science and other disciplines including philosophy and logic cognitive science knowledge management linguistics and management science with a view to understanding and solving problems and applying research results to practice Areas covered by the papers include conceptual modeling knowledge and information modeling and discovery linguistic modeling cross cultural communication and social computing environmental modeling and engineering and multimedia data modeling and systems The book will be of interest to all those whose work involves the development or use of information modeling and knowledge bases **Data**

Mining Techniques in Grid Computing Environments Werner Dubitzky,2008-12-22 Based around eleven international real life case studies and including contributions from leading experts in the field this groundbreaking book explores the need for the grid enabling of data mining applications and provides a comprehensive study of the technology techniques and management skills necessary to create them This book provides a simultaneous design blueprint user guide and research agenda for current and future developments and will appeal to a broad audience from developers and users of data mining and grid technology to advanced undergraduate and postgraduate students interested in this field *Machine Learning Using R* Karthik Ramasubramanian,Abhishek Singh,2018-12-12 Examine the latest technological advancements in building a scalable machine learning model with big data using R This second edition shows you how to work with a machine learning

algorithm and use it to build a ML model from raw data You will see how to use R programming with TensorFlow thus avoiding the effort of learning Python if you are only comfortable with R As in the first edition the authors have kept the fine balance of theory and application of machine learning through various real world use cases which gives you a comprehensive collection of topics in machine learning New chapters in this edition cover time series models and deep learning What You ll Learn Understand machine learning algorithms using R Master the process of building machine learning models Cover the theoretical foundations of machine learning algorithms See industry focused real world use cases Tackle time series modeling in R Apply deep learning using Keras and TensorFlow in R Who This Book is For Data scientists data science professionals and researchers in academia who want to understand the nuances of machine learning approaches algorithms in practice using R

Advances in Web Intelligence Piotr S. Szczepaniak,Adam Niewiadomski,2005-05-24 In recent years the Internet has become a source of data and information of indisputable importance and has immensely gained in acceptance and popularity The World Wide Web WWW or Web for short frequently named the nervous system of the information society offers numerous valuable services leaving no doubt about the significance of the Web in our daily activities at work and at home Consequently we have a clear aspiration to meet the obvious need for effective use of its potential by making improvements in both the methods and the technology applied Among the new research directions observable in Web related applications intelligent methods from within the broadly perceived topic of soft computing occupy an important place AWIC the Atlantic Web Intelligence Conferences are intended to be a forum for exchange of new ideas and novel practical solutions in this new and exciting field The conference was born as an initiative of the WIC Poland and the WIC Spain Research Centres both belonging to the Web Intelligence Consortium WIC <http://wi-consortium.org> So far three AWIC conferences have been held in Madrid Spain 2003 in Cancun Mexico 2004 and in dz Poland 2005
