Database Programming With Jdbc And Java:

Database Programming with JDBC and Java George Reese, 2000 Java and databases make a powerful combination Getting the two sides to work together however takes some effort largely because Java deals in objects while most databases do not This book describes the standard Java interfaces that make portable object oriented access to relational databases possible and offers a robust model for writing applications that are easy to maintain It introduces the JDBC and RMI packages and uses them to develop three tier applications applications divided into a user interface an object oriented logic component and an information store The book begins with a quick overview of SQL for developers who may be asked to handle a database for the first time It then explains how to issue database queries and updates through SQL and JDBC It also covers the use of stored procedures and other measures to improve efficiency where these are available But the book s key contribution is a set of patterns that let developers isolate critical tasks like object creation information storage and retrieval and the committing or aborting of transactions The second edition includes more basics of JDBC and SQL with more examples and a deeper discussion about the architecture of a robust maintainable database application The second edition also explains the relationship between JDBC and Enterprise JavaBeans

Java Programming For Developers: The Definitive Guide to Learn JDBC And Database Applications Vivian Siahaan,Rismon Hasiholan Sianipar,2019-11-28 This step by step guide to explore database programming using Java is ideal for people with little or no programming experience The goal of this concise book is not just to teach you Java but to help you think like a programmer Each brief chapter covers the material for one week of a college course to help you practice what you've learned As you would expect this book shows how to build from scratch two different databases MariaDB and SQLite using Java In designing a GUI and as an IDE you will make use of the NetBeans tool In the first chapter you will learn the basics of cryptography using Java Here you will learn how to write a Java program to count Hash MAC Message Authentication Code store keys in a KeyStore generate PrivateKey and PublicKey encrypt decrypt data and generate and verify digital prints In the second chapter you will learn how to create and store salt passwords and verify them You will create a Login table In this case you will see how to create a Java GUI using NetBeans to implement it In addition to the Login table in this chapter you will also create a Client table In the case of the Client table you will learn how to generate and save public and private keys into a database You will also learn how to encrypt decrypt data and save the results into a database In the third chapter you will

create an Account table This account table has the following ten fields account_id primary key client_id primarykey account_number account_date account_type plain_balance cipher_balance decipher_balance digital_signature and signature_verification In this case you will learn how to implement generating and verifying digital prints and storing the results into a database In the fourth chapter You create a table with the name of the Account which has ten columns account_id primary key client_id primarykey account_number account_date account_type plain_balance cipher_balance decipher_balance digital_signature and signature_verification In the fifth chapter you will create a Client_Data table which has the following seven fields client_data_id primary key account_id primary_key birth_date address mother_name telephone and photo_path In chapter six you will be shown how to create SQLite database and tables with Java In chapter seven you will be taught how to extract image features utilizing BufferedImage class in Java GUI Digital image techniques to extract image features used in this chapter are grascaling sharpening invertering blurring dilation erosion closing opening vertical prewitt horizontal prewitt Laplacian horizontal sobel and vertical sobel For readers you can develop it to store other advanced image features based on descriptors such as SIFT and others for developing descriptor based matching In chapter eight you will be taught to create Java GUI to view edit insert and delete Suspect table data This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo In chapter nine you will be taught to create Java GUI to view edit insert and delete Feature_Extraction table data This table has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 All six fields except keys will have a BLOB data type so that the image of the feature will be directly saved into this table In chapter ten you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In chapter eleven you will add two tables Victim and Case_File The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The Case_File has seven columns case_file_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete data in both tables Finally this book is hopefully useful and can improve database programming skills for every Java MariaDB SQLite pogrammer

Java Database Programming Brian Jepson,1997 Java Database Programming teaches you the critical new Java database technologies and tools including Sun Microsystems Java Database Connectivity JDBC standard You ll learn practical step by step techniques with which you can harness the Java programming language You will also learn how to

create dynamic database applications and applets in both Internet and Intranet environments **Step By Step Java GUI With JDBC & MySQL : Practical approach to build database desktop application with project based examples**

Hamzan Wadi, This book comes as an answer for students lecturers or the general public who want to learn Java GUI programming starting from scratch This book is suitable for beginner learners who want to learn Java GUI programming from the basic to the database level This book is also present for JAVA learners who want to increase their level of making GUI based database applications for small medium or corporate businesses level The discussion in this book is not wordy and not theoretical Each discussion in this book is presented in a concise and clear brief and directly to the example that implements the discussion Beginner learners who want to learn through this book should not be afraid of losing understanding of the programming concepts because this book in detail discusses the concepts of Java programming from the basic to the advanced level By applying the concept of learning by doing this book will guide you step by step to start Java GUI programming from the basics until you are able to create database applications using JDBC and MySQL Here are the material that you will learn in this book CHAPTER 1 This chapter will give you brief and clear introduction about how to create desktop application using Java GUI starting from how to setup your environments create your first project understand various control for your form and understand how to interact with your form using event handling CHAPTER 2 This chapter will discuss clearly about the concept and the implementatiton of data types and variables in Java GUI CHAPTER 3 This chapter will discuss in detail about how to make decisions or deal with a condition in the program This chapter is the first step to deeper understanding of logics in programming This chapter specifically discusses relational operators and logical operators if statements if else statements and switch case statements and how to implement all of these conditional statements using Java GUI CHAPTER 4 This chapter will discuss in detail the looping statements in Java including for statement while statement do while statement break statement and continue statement All of these looping statements will be implemented using Java GUI CHAPTER 5 This chapter will discuss how to use methods to group codes based on their funcitonality This discussion will also be the first step for programmers to learn how to create efficient program code This chapter will discuss in detail the basics of methods methods with return values how to pass parameters to methods how to overload your methods and how to make recursive methods CHAPTER 6 This chapter will discuss in detail how to create and use arrays read and write file operations and how to display data stored in arrays or files in graphical form CHAPTER 7 This chapter will discuss in detail the basics of MySQL how to access databases using JDBC and MySQL and how to perform CRUD operations using JDBC and MySQL CHAPTER 8 In this chapter we will discuss more about Java GUI programming This chapter will discuss in detail about how to make a program that consists of multi forms how to create MDI application and how to create report using iReport with data stored in a database Journal of Database Management ,1999 **MySQL and MSQL** Randy Jay Yarger,George Reese,Tim King,1999 A guide to the SQL based database applications covers
