Classical, Semi-classical and Quantum Noise Leon Cohen,H. Vincent Poor,Marlan O. Scully,2011-12-21 David Middleton was a towering figure of 20th Century engineering and science and one of the founders of statistical communication theory During the second World War the young David Middleton working with Van Fleck devised the notion of the matched filter which is the most basic method used for detecting signals in noise Over the intervening six decades the contributions of Middleton have become classics This collection of essays by leading scientists engineers and colleagues of David are in his honor and reflect the wide influence that he has had on many fields Also included is the introduction by Middleton to his forthcoming book which gives a wonderful view of the field of communication its history and his own views on the field that he developed over the past 60 years Focusing on classical noise modeling and applications Classical Semi Classical and Quantum Noise includes coverage of statistical communication theory non stationary noise molecular footprints noise suppression Quantum error correction and other related topics

Sampling Theory, a Renaissance Götz E. Pfander,2015-12-08 Reconstructing or approximating objects from seemingly incomplete information is a frequent challenge in mathematics science and engineering A multitude of tools designed to recover hidden information are based on Shannon s classical sampling theorem a central pillar of Sampling Theory The growing need to efficiently obtain precise and tailored digital representations of complex objects and phenomena requires the maturation of available tools in Sampling Theory as well as the development of complementary novel mathematical theories Today research themes such as Compressed Sensing and Frame Theory re energize the broad area of Sampling Theory This volume illustrates the renaissance that the area of Sampling Theory is currently experiencing It touches upon trendsetting areas such as Compressed Sensing Finite Frames Parametric Partial Differential Equations Quantization Finite Rate of Innovation System Theory as well as sampling in Geometry and Algebraic Topology
