Higham, 1968 [Biermann's Handbook of Pulp and Paper](#) Pratima Bajpai, 2018-05-17 Biermann's Handbook of Pulp and Paper Raw Material and Pulp Making Third Edition is a comprehensive reference for industry and academia covering the entire gamut of pulping technology This book provides a thorough introduction to the entire technology of pulp manufacture features chapters covering all aspects of pulping from wood handling at the mill site through pulping and bleaching and pulp drying It also includes a discussion on bleaching chemicals recovery of pulping spent liquors and regeneration of chemicals used and the manufacture of side products The secondary fiber recovery and utilization and current advances like organosolv pulping and attempts to close the cycle in bleaching plants are also included Hundreds of illustrations charts and tables help the reader grasp the concepts being presented This book will provide professionals in the field with the most up to date and comprehensive information on the state of the art techniques and aspects involved in pulp making It has been updated revised and extended Alongside the traditional aspects of pulping and papermaking processes this book also focuses on biotechnological methods which is the distinguishing feature of this book It includes wood based products and chemicals production of dissolving pulp hexenuronic acid removal alternative chemical recovery processes forest products biorefinery The most significant changes in the areas of raw material preparation and handling pulping and recycled fiber have been included A total of 11 new chapters have been added This handbook is essential reading for all chemists and engineers in the paper and pulp industry Provides comprehensive coverage on all aspects of pulp making Covers the latest science and technology in pulp making Includes traditional and biotechnological methods a unique feature of this book Presents the environmental impact of pulp and papermaking industries Sets itself apart as a valuable reference that every pulp and papermaker engineer chemist will find extremely useful [Biermann's Handbook of Pulp and Paper](#) Pratima Bajpai, 2018-05-17 Biermann's Handbook of Pulp and Paper Paper and Board Making Third Edition provides a thorough introduction to paper and board making providing paper technologists recent information The book emphasizes principles and concepts behind papermaking detailing both the physical and chemical processes It has been updated revised and extended Several new chapters have been added

Papermaking chemistry has found an adequate scope covering this important area by basics and practical application. Scientific and technical advances in refining including the latest developments have been presented. The process of stock preparation describes the unit processes. An exhaustive overview of Chemical additives in Pulp and Paper Industry is included. Paper and pulp processing and additive chemicals are an integral part of the total papermaking process from pulp slurry through sheet formation to effluent disposal. Water circuits with loop designs and circuit closure are presented. The chapter on paper and board manufacture covers the different sections in the paper machine and also fabrics rolls and roll covers and describes the different types of machines producing the various paper and board grades. Coating is dealt with in a separate chapter covering color formulation and preparation and also coating application. Paper finishing gives an insight into what happens at roll slitting and handling. The chapter on environmental impact includes waste water treatment and handling, air emissions utilization and solid residue generation and mitigation. The major paper and board grades and their properties are described. Biotechnological methods for paper processing are also presented. This handbook is essential reading for Applied Chemists, Foresters, Chemical Engineers, Wood Scientists and Pulp and Paper technologists, Engineers and anyone else interested or involved in the pulp and paper industry. Provides comprehensive coverage on all aspects of papermaking. Covers the latest science and technology in papermaking. Includes traditional and biotechnological methods, a unique feature of this book. Presents the environmental impact of papermaking industries. Sets itself apart as a valuable reference that every pulp and papermaker, engineer, chemist will find extremely useful.

Handbook of Pulp, 2 Volume Set Herbert Sixta, 2006-03-17

In this two volume set Dr Herbert Sixta, head of the cellulose and viscose research department at Lenzing AG in Austria, has brought together a team of authors to produce the first comprehensive handbook on the market. Alongside the traditional aspects of pulping processes, pulp used in industry and paper pulps, this book describes all pulping processes used for paper and board manufacturing as well as waste liquor treatment, pulp bleaching and environmental aspects, while also covering pulp properties and applications. From the content: Chemical Pulp, Mechanical Pulp, Recovered Paper and Recycled Fibers, Analytical Characterization of Pulp. This handbook is essential reading for all chemists and engineers in the paper and pulp industry.

Excerpt from *The Art of Paper Making: A Practical Handbook of the Manufacture of Paper From Rags, Esparto, Straw and Other Fibrous Materials Including the Manufacture of Pulp From Wood Fibre*. In the present volume, while

describing the various operations involved in the manufacture of paper the Author has endeavoured to render the work serviceable as a book of reference in respect to the processes and improvement which have from time been introduced and many of which have been more or less practically applied either at home or abroad The recovery of soda from waste liquors has been fully dealt with and the details of several applied processes explained Special attention has also been directed to some of the more important methods of producing pulp from wood fibre since it is highly probable that from this inexhaustible source the paper maker will ultimately derive much of the cellulose used in his manufacture Indeed it may be deemed equally probable when the processes for disintegrating wood fibre so largely applied in America and on the Continent become better understood in this country that their adoption here will become more extensive than has hitherto been the case About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
