

Harvard Case Study Format for Write-up

1. Immediate Issue(s) or Problem(s):

Define the immediate problem(s) or identify the decision(s) that must be made. State a time frame; how long do you have to make the decision?

2. Basic Issue(s) or Associated Issue(s):

List any other issue that might influence your decision. These can be higher level, strategic issues.

3. Issue(s) Analysis or Information Summary:

Summarize the important or major pieces of information from the case. Identify which are the facts, opinions and assumptions. State your assumptions clearly. Analyze any financial information made available in the case; financial analysis is an essential part of your analysis. Identify any long term issues.

4. Alternative Solutions or Options: The most important part!

List the various options available to resolve the problem. Discuss each option and state the advantages (pro) and disadvantages (cons) of each option. Refer to quantitative and/or qualitative information as needed in order to demonstrate the points raised.

This is the major part of the case and demonstrates that you clearly understand the issue(s) and the various possible outcomes. There are usually at least three good options in a case and often many more. Identify each option clearly and always show the pros and cons of each.

5. Recommendation(s) and Implementation:

Based on the analysis of the options, state what you would do to correct the problem (recommendation) and how you would do this (implementation). Your recommendation is usually a restatement of the best option. This is not the time to analyze new options. The implementation plan should list the steps and include a time frame or target date.

6. Monitor and Control:

State the method(s) you will use to determine if your recommendation and implementation plan are working. Some examples are use of budgets, regularly scheduled meetings or scheduled reviews. The approach you use will depend on the nature of the recommendation.

The Power of Neurodiversity Thomas Armstrong, 2025-07-29 From a bestselling author and psychologist an exploration and celebration of neurodivergence completely revised with the most up to date research and insights From ADHD and dyslexia

to autism the number of diagnosis categories listed by the American Psychiatric Association has tripled in the last fifty years. With so many people affected it is time to revisit our perceptions of people with disabilities. Thomas Armstrong illuminates a new understanding of neuropsychological disorders. He argues that if they are a part of the natural diversity of the human brain they cannot simply be defined as illnesses. Armstrong explores the evolutionary advantages, special skills, and other positive dimensions of these conditions including autism, ADHD, dyslexia, schizophrenia, anxiety, intellectual disabilities, and mood disorders. With an emphasis on positive niche construction for each area, *The Power of Neurodiversity* is a manifesto as well as a keen look at disability as well as a must read for parents, teachers, and anyone who is looking to learn more about neurodivergence.

Case Study Methodology in Higher Education Baron, Annette, McNeal, Kelly, 2019-06-28. In higher education, case studies can be utilized to have students put themselves into problems faced by a protagonist and by doing so address academic or career-related issues. Working through these issues provides students with an opportunity to gain applied perspective and experiences. Professors in higher education who choose this method of teaching require navigational tools to ensure that students achieve stated learning objectives. *Case Study Methodology in Higher Education* is an essential research publication that focuses on the history and theories relating to case study methodology, including techniques for writing case studies and utilizing them in university settings to prepare students for real-life, career-related scenarios. This publication features a wide range of topics such as educational leadership, case writing, and teacher education. It is essential for educators, career professionals, higher education faculty, researchers, and students.

Digital Business Models Bernd W. Wirtz, 2019-04-02. The spread of the Internet into all areas of business activities has put a particular focus on business models. The digitalization of business processes is the driver of changes in company strategies and management practices alike. This textbook provides a structured and conceptual approach, allowing students and other readers to understand the commonalities and specifics of the respective business models. The book begins with an overview of the business model concept in general by presenting the development of business models, analyzing definitions of business models, and discussing the significance of the success of business model management. In turn, Chapter 2 offers insights into and explanations of the business model concept and provides the underlying approaches and ideas behind business models. Building on these foundations, Chapter 3 outlines the fundamental aspects of the digital economy. In the following chapters, the book examines various core models in the business-to-consumer (B2C) context. The chapters follow a 4 C approach that divides the digital B2C businesses into models focusing on content, commerce, context, and connection. Each chapter describes one of the four models and provides information on the respective business model types, the value chain, core assets, and competencies, as well as a case study. Based on the example of Google, Chapter 8 merges these approaches and describes the development of a hybrid digital business model. Chapter 9 is dedicated to business-to-business (B2B) digital business models. It shows how companies focus on business solutions such as online provision of sourcing, sales, supportive collaboration, and broker services. Chapter

10 shares insight into the innovation aspect of digital business models presenting structures and processes of digital business model innovation The book is rounded out by a comprehensive case study on Google Alphabet that combines all aspects of digital business models Conceived as a textbook for students in advanced undergraduate courses the book will also be useful for professionals and practitioners involved in business model innovation and applied researchers
