'Smart dust' aims to monitor everything

By John D. Butler, CNN
May 3, 2010 9:27 a.m. EDT

Taking the Earth's pulse

What if we put tiny sensors on everything? That's the vision for "smart dust." We could learn about ourselves, our cities and the environment in a way that might help us live more efficiently. Click on each picture to learn more.

STORY HIGHLIGHTS

'Smart dust' refers to tiny sensors that would monitor everything on Earth.

The concept was dreamed up by an academic in the 1990s.

But it's becoming increasingly real, as companies deploy wireless sensor networks.

AP says it aims to put a billion sensors all over the globe.

Palo Alto, California (CNN) -- In the 1990s, a researcher named Kris Pister dreamed up a wild future in which people would sprinkle the Earth with countless tiny sensors, no larger than grains of rice.

These "smart dust" particles, as he called them, would monitor everything, acting like electronic nerve endings for the planet. Filled with computing power, sensing equipment, wireless radios and long battery life, the smart dust would make observations and relay mountains of real-time data about people, cities and the natural environment.

Now, a version of Pister's smart-dust fantasy is starting to become reality.

"It's exciting. It's been a long time coming," said Pister, a computing professor at the University of California, Berkeley.

"I coined the phrase 14 years ago. So smart dust has taken a while, but it's finally here."

Maybe not exactly how he envisioned it. But there has been progress.

The latest news comes from the computer and printing company Hewlett-Packard, which recently announced it's working on a project it calls the "Central Nervous System for the Earth." In coming years, the company plans to deploy a billion sensors all over the planet.

Technolife 2035 Elina Hiltunen, Kari Hiltunen, 2015-10-05 Technology constantly evolves usually slowly and insidiously but always just as surely Things that are currently being developed in laboratories will be in the public domain as different products and applications perhaps as soon as in a few years time and as more refined versions in around ten years time This book deals with the future of technology and explores the influence new technologies may have on life within the next twenty years It is divided into three parts the first of which discusses technological development and the forces and counter forces related to it This section also reviews how advances in technology are forecasted and what kinds of parties make these predictions and provides examples of forecasts for the next couple of decades The second part of the book investigates the various areas of technology and their related trends This section discusses current technological studies which may have concrete impacts in everyday life in a few decades such as those in the fields of energy transportation biotechnology materials ICT robotics medical technology and space technology The third part of the book introduces the authors visions of how technology may develop by 2035 and presents three different scenarios or future worlds These will demonstrate the possible directions in which technological development can take us The scenarios are introduced through two main characters Romeo and Juliet adapted from Shakespeare's play in the year 2035 Even though technology is

constantly changing the writers believe that even years into the future the significance of human relations will remain the greatest influence on human life

The Geoengineered Transhuman Elana Freeland, 2025-02-25 Explores how chemicals and nanotechnology are being continuously delivered via chemtrail aerosols by jets drones and rockets in the guise of climate change Examines the public private partnerships behind transhumanism including Big Pharma GMO agribusiness DARPA IARPA corporations and foundations Reveals the reality of the secret space program SSP and the planetary smart grid of 5G 6G the Internet of Things IoT and artificial intelligence AI What if the degradation of the planet is not just a byproduct of human greed but the explicit intention of government agencies bought off by corporations What if their intent is to create a post human global government run by AI populated by a genetically and electromagnetically altered Homo sapiens loaded with nanotechnology and run by 5G 6G 7G transceivers from space Building on decades of research Elana Freeland offers a comprehensive expos of the transhumanist agenda the transformation of humanity into a slave class by means of biotechnology genetic engineering molecular nanotechnology and artificial intelligence She reveals that weather control is already a global reality thanks to the aerosol chemtrails that maintain the ionized atmosphere needed for a myriad of military and civilian wireless operations The air we breathe the soil we grow our food in and the water we drink have all been altered away from Nature and toward a synthetic metaverse Meanwhile Big Pharma injects nano sized hardware and software in vivo that activate a transhumanist brain computer interface with AI The author also examines the public private partnerships behind transhumanism and reveals the reality of the secret space program and the planetary smart grid of 5G 6G The eons old dream of global power seems to be coming of age in this overwhelmingly technological era of domination by the wealthy And yet by exposing the transhumanist agenda and studying the technology being employed to subjugate the human race we have the opportunity to find ways not just to resist becoming machines ourselves but to utilize our technologies for restoring a high civilization in service to the Good the Beautiful and the True

Under an Ionized Sky Elana Freeland, 2018-02-13 It is difficult to believe that our planet has been weaponized before our very eyes but that is exactly what has happened First we were seduced by the convenience of a wireless world then atmospheric weather experimentation in the guise of carbons climate change converted the air we breathe into an antenna Now the geo engineering we ve been subjected to for two decades is being normalized as the Star Wars Space Fence rises around and within us Is this the Space Age we were promised
