Warren-Alquist State Energy Resources Conservation and Development Act, Public Resources Code Section 25000 Et Seq California, 2004 Harness the Sun Philip Warburg, 2016-09-06 Going from the inner city to the open desert a seasoned environmental advocate looks at solar energy's remarkable ascent and its promise for America's future Solar power was once the domain of futurists and environmentally minded suburbanites Today it is part of mainstream America Scan the skyline of downtown neighborhoods check out the rooftop of the nearest Walmart and take a close look at your local sports arena Chances are you'll find solar panels in those and many other unexpected places In *Harness the Sun* Philip Warburg takes readers on a far flung journey that explores America's solar revolution Beginning with his solar powered

home in New England he introduces readers to the pioneers who are spearheading our move toward a clean energy economy We meet the CEOs who are propelling solar power to prominence and the intrepid construction workers who scale our rooftops installing panels We encounter the engineers who are building giant utility scale projects in prime solar states like Nevada Arizona and California and the biologists who make sure wildlife is protected at those sites Warburg shows how solar energy has won surprising support across the political spectrum Prominent conservatives embrace solar power as an emblem of market freedom while environmental advocates see it as a way to reduce America s greenhouse gas emissions At the same time economic justice activists celebrate solar s potential to lift up low income communities and Native American leaders welcome the income and jobs that the industry will bring to their communities Yet solar energy has its downsides and detractors too Conservationists worry about the impact of large solar farms on protected animal species and some local citizens groups resent the encroachment of solar projects on farmland and open spaces Warburg gives voice to those at the epicenter of these conflicts and points the way to constructive solutions *Harness the Sun* offers a grounded persuasive vision of America s energy future It is a future fueled by clean renewable sources of power with solar at center stage *Energy Aware Planning Guide* ,2011 *Statutes of California and Digests of Measures California*,2008 Summary of ... State Legislation ,2002 **Justice in Climate Action Planning** Brian Petersen,Hélène B. Ducros,2021-12-01 This edited volume examines how climate action plans engage justice at the scale of the city Recent events in the United States make the context particularly ripe for a discussion of justice in urban climate politics On the one hand the emergence of the Black Lives Matter movement George Floyd s death and the prominence of racial discrimination in the public realm have mainstreamed the notion of justice On the other hand the dire consequences of increased frequency and severity of climate events on vulnerable segments of urban populations are undeniable While some cities have been proactive about integrating justice in their climate action planning in most places an explicit and systematic link between both spheres has been lacking This book explores this interface as it seeks to understand how cities can respond to climate change in a just way and for just outcomes While resilience strategies based on development may engage historic inequities they may at the same time result in marginalizing certain populations through various processes from mismatched solutions to outright exclusion and climate gentrification By identifying how certain populations are included in or excluded from climate action planning practices the chapters in this volume draw on case studies to outline the differential outcomes of climate action in American cities also proposing a template for comparative work beyond the US The authors tackle the debate about how justice is or is not integrated in climate action plans and assess practical implications while also making theoretical and methodological contributions As it fills a gap in the literature at the intersection of justice and climate action the book produces new insights for a wide ranging audience students practitioners policy makers planners the non profit sector and scholars in geography urban planning urban studies environmental studies ecology political science or anthropology Along five axes of investigation

theory resilience equity community and comparison as method the contributors offer various pathways into the intersection between urban climate action and different understandings of justice Collectively they invite a reflection that can lead to practical initiatives in climate mitigation while also advancing the theorization of social justice to account for the urban as a node where in justice plays out and can be addressed with significant results [Handbook of Multi-Level Climate Actions](#) Mark Starik,Gordon P.
