Competence Based Education and Training (CBET) and the End of Human Learning John Preston,2017-05-04 This book radically counters the optimism sparked by Competence Based Education and Training an educational philosophy that has re emerged in Schooling Vocational and Higher Education in the last decade CBET supposedly offers a new type of learning that will lead to skilled employment here Preston instead presents the competency movement as one which makes the concept of human learning redundant Starting with its origins in Taylorism the slaughterhouse and radical behaviourism the book charts the history of competency education to its position as a global phenomenon today arguing that competency is opposed to ideas of process causality and analog human movement that are fundamental to human learning

Competency-based Education and Training Roger Harris,1995 *Illinois Competency Based Education Programs and the Employment and Training Community* ,1984 Competency-Based Education in Aviation Suzanne K. Kearns,Timothy J.

Mavin, Steven Hodge, 2017-05-15 Whether a trainee is studying air traffic control piloting maintenance engineering or cabin crew they must complete a set number of training hours before being licensed or certified The aviation industry is moving away from an hours based to a competency based training system Within this approach training is complete when a learner can demonstrate competent performance Training based on competency is an increasingly popular approach in aviation It allows for an alternate means of compliance with international regulations which can result in shorter and more efficient training programs However there are also challenges with a competency based approach The definition of competency based education can be confusing training can be reductionist and artificially simplistic professional interpretation of written competencies can vary between individuals and this approach can have a high administrative and regulatory burden

Competency Based Education in Aviation Exploring Alternate Training Pathways explores this approach to training in great detail considering the four aviation professional groups of air traffic control pilots maintenance engineers and cabin crew Aviation training experts were interviewed and have contributed professional insights along with personal stories and anecdotes associated with competency based approaches in their fields Research based and practical strategies for the effective creation delivery and assessment of competency based education are described in detail
