*Percutaneous Penetration Enhancers Drug Penetration Into/Through the Skin* Nina Dragicevic,Howard I. Maibach,2017-05-04  
Percutaneous Penetration Enhancers in a mini series format comprising five volumes represents the most comprehensive reference on enhancement methods both well established and recently introduced in the field of dermal transdermal drug delivery In detail the broad range of both chemical and physical methods used to enhance the skin delivery of drugs is described All aspects of drug delivery and measurement of penetration are covered and the latest findings are provided on skin structure and function mathematics in skin permeation and modern analytical techniques adapted to assess and measure penetration In offering a detailed description of the methods currently in use for penetration enhancement this book will be of value for researchers pharmaceutical scientists practitioners students and dermatological scientists or dermatologists Schooling and Difference in Africa George Jerry Sefa Dei,Riyad Ahmed Shahjahan,Sharon Eblaghie Bahador,Alireza Asgharzadeh,2006-01-01 Since the 1950s when most African countries gained political independence schooling has presented very difficult challenges In the discussion of these challenges however the issue of diversity has received relatively little attention Schooling and Difference in Africa aims to understand how differences such as ethnicity class gender language religion and disability play out in African schools systems and more specifically in Ghana Together George J Sefa Dei Alireza Asgharzadeh Sharon Eblaghie Bahador and Riyad Ahmed Shahjahan promote educational inclusion in the context of African schooling The aspects of diversity explored in this study include minority majority relations race ethnicity gender language class religion and physical dis ability The authors build their analyses of these issues around a series of interviews which project a perspective that policy makers and administrators rarely seek out By studying the challenges of inclusive education in Ghana and further by making comparisons with the Canadian context this volume seeks to shed light on the ongoing struggle for an empowering school system in Africa and elsewhere **Catalogue** Ghana Book Publishers Association,1993 Modern Mathematics Dirk De Bock,2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide

exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends
