Natural Products Isolation Satya D. Sarker, 2008-02-05 The term natural products spans an extremely large and diverse range of chemical compounds derived and isolated from biological sources Our interest in natural products can be traced back thousands of years for their usefulness to humankind and this continues to the present day Compounds and extracts derived from the biosphere have found uses in medicine agriculture cosmetics and food in ancient and modern societies around the world Therefore the ability to access natural products understand their usefulness and derive applications has been a major driving force in the field of natural product research The first edition of Natural Products Isolation provided readers for the first time with some practical guidance in the process of extraction and isolation of natural products and was the result of Richard Cannell's unique vision and tireless efforts Unfortunately Richard Cannell died in 1999 soon after completing the first edition We are indebted to him and hope this new edition pays adequate tribute to his excellent work The first edition laid down the ground rules and established the techniques available at the time Since its publication in 1998 there have been significant developments in some areas in natural product isolation To capture these developments publication of a second edition is long overdue and we believe it brings the work up to date while still covering many basic techniques known to save time and effort and capable of results equivalent to those from more recent and expensive techniques

Bioactive Compounds and Nutraceuticals from Plant Sources Charanjit S. Riar, Parmjit S. Panesar, 2024-07-05 This new volume focuses on the technology of bioactive compounds and nutraceuticals from fruit and

vegetable sources from cereal grain sources and from cereal processing by products The chapters look at the extraction technologies analytical techniques and potential health prospects specifically from fruits and vegetables sources They cover plants such plantation crops roots and tubers as well as fruit and vegetable processing byproducts They also consider bioactive compounds and nutraceuticals from major and minor cereal grain sources and from cereal processing byproducts This new book provides valuable insight for food technologists and those in related areas of research Bioactive Compounds and Nutraceuticals from Plant Sources Extraction Technology Analytical Techniques and Potential Health Prospects is the companion volume to Bioactive Compounds and Nutraceuticals from Dairy Marine and Nonconventional Sources Extraction Technology Analytical Techniques and Potential Health Prospects by the same editors *A Textbook of Herbal Drug Technology* Prof. (Dr.) Stuti Verma, Prof.(Dr.) Rahul Kumar Sharma, Prof.(Dr.) Anup Kumar Sirbaiya, Mr. Rajeev Kumar, Mrs. Priyanka Yadav, Mr. Gulam Muheyuddeen,2025-06-12 Herbal Drug Technology presents a comprehensive and scientific approach to the study of herbal medicines aligning traditional healing systems with modern pharmaceutical practices Intended primarily for pharmacy students and aligned with the PCI curriculum the book also serves as a valuable reference for researchers practitioners of Ayurveda and allied systems and professionals in the herbal drug and nutraceutical industries It explores the journey of herbal drugs from plant to product covering topics such as plant taxonomy collection and authentication of raw materials pharmacognostic evaluation phytochemical extraction formulation development and analytical techniques for standardization The book also delves into herbal cosmetics nutraceuticals and the use of advanced techniques like chromatography and spectroscopy for quality assurance It addresses global and Indian regulatory requirements intellectual property rights and ethical aspects of bioprospecting With case studies current industry practices and comparative insights from traditional and modern medicine this text goes beyond the basics to build a strong conceptual and practical foundation for future professionals in herbal healthcare

Technologies for Value Addition in Food Products and Processes Sankar Chandra Deka,Dibyakanta Seth,Nishant Rachayya Swami Hulle,2019-10-28 The new volume looks at some important emerging food processing technologies in light of the demand for functional food products and high value and nutritionally rich products Technologies for Value Addition in Food Products and Processes covers a selection of important recent developments in food processing that work to enrich or maintain nutritional value of food products including such applications as non thermal plasma refractance window drying extrusion enzyme immobilization and dry fractionation Dry fractionation in particular has emerged as a sustainable alternative to wet processes in last three decades for producing protein concentrates from legumes Several chapters on fish processing cover both traditional knowledge and advances in fish processing technologies A chapter on bioethanol production discusses the past and present status of the industry focusing on economic feasibility and environmental viability A chapter also discusses traditional fermentation process and nutritional aspects of ethnic foods followed by the Rabha Hasong Mishing and Karbi communities

of Assam India With the contribution from experts in their respective fields this volume provides new information on novel food processing technologies

Food Bioactives and Nutraceuticals Syed Amir Ashraf, Mohd Adnan, 2025-02-24 This book examines nutraceuticals derived from plant animal or microbial sources and presenting significant opportunities for food scientists and industry professionals to develop innovative foods or food components that address future human wellness and well being requirements These nutraceuticals can be specifically identified as antioxidants dietary fiber prebiotics polyunsaturated fatty acids probiotics vitamins polyphenols and spices The book also intends to consolidate current research and reviews on bioactive components inherent in traditional foods highlighting their nutraceutical significance for promoting a healthy lifestyle Moreover it elaborates on the potential therapeutic applications of food bioactives as next generation nutraceuticals sourced from novel origins Emphasis is placed on various aspects of food bioactive compounds exploring their prospective roles in the formulation of nutraceuticals aimed at enhancing human health and wellness while also evaluating their potential in the management and prevention of metabolic disorders Furthermore the volume acknowledges the clinical implications of nutraceuticals including their prospective applications within the food and pharmaceutical industries

Pharmacognosy and Phytochemistry Uchenna E. Odoh, Shailendra S. Gurav, Michael O. Chukwuma, 2025-04-08 Key information on plant based chemical and pharmacology research from basics and principles through recent technological advances Pharmacognosy and Phytochemistry provides an overview of the basics of pharmacognosy and phytochemistry from early principles through contemporary advances like molecular pharmacognosy The book covers the classification of crude drugs complementary and alternative medical CAM systems adulteration and evaluation of drugs extraction methods of plant drugs and ethnobotany and ethnopharmacology The book also reviews the historical overview therapeutic application cultural and ecological dimensions of plant based medicines Other key chapters discuss biotechnology and clinical pharmacognosy Written by a group of expert contributors Pharmacognosy and Phytochemistry reviews sample topics including Methodologies for extracting bioactive compounds and techniques to perform qualitative and quantitative phytochemical analysis Therapeutic potential of plant secondary metabolites and the processes of isolation purification and characterization of herbal drugs Biological screening methods and biosynthetic pathways of phytopharmaceuticals pharmaceutical aids nutraceuticals cosmeceuticals pesticides and allergens Comparative phytochemistry chemotaxonomy and the emerging field of marine pharmacognosy Combining traditional knowledge with modern advancements to provide a holistic understanding of two important fields Pharmacognosy and Phytochemistry serves as an excellent resource for students researchers and practitioners
