Problem Solving, Abstraction, and Design Using C++ Frank L. Friedman, Elliot B. Koffman,2011 ndice abreviado 0 Computer science as a career path 1 Introduction to computers problem solving and programming 2 Overview of C 3 Top down design with functions and classes 4 Selection structures if and switch statements 5 Repetition and loop statements 6 Modular programming 7 Simple data types 8 Streams and files 9 Data structures arrays and structs 10 User defined classes 11 Data abstraction and object oriented design 12 Recursion 13 Pointers and dynamic data structures 14 Multiprocessing using processes and threads *Data Abstraction and Problem Solving with C++* Frank M. Carrano,1995 This work provides novice and professional programmers with a bridge from traditional programming methods to the object oriented techniques available in C It clearly explains encapsulation and C classes which are then used throughout to implement abstract data types such as lists stacks queues trees and tables Inheritance polymorphism templates and operator overloading are explained both conceptually and through examples The work offers early extensive coverage of recursion and uses the technique through many examples and exercises It sets out to provide a firm foundation in data abstraction emphasizing the distinction between specification and implementation Problem Solving, Abstraction and Design Using C++ Frank Friedman,1997-01-01

Data Abstraction and Problem Solving with C++ Frank M. Carrano,Paul Helman,Robert Veroff,1998 Focusing on data abstraction and data structures the second edition of this very successful book continues to emphasize the needs of both the instructor and the student The book illustrates the role of classes and abstract data types ADTs in the problem solving process as the foundation for an object oriented approach Throughout the next the distinction between specification and implementation is continually stressed The text covers major applications of ADTs such as searching a flight map and performing an event driven simulation It also offers early extensive coverage of recursion and uses this technique in many examples and exercises Overall the lucid writing style widespread use of examples and flexible coverage of material have helped make this a leading book in the field Book Jacket Problem Solving, Abstraction, and Design Using C++ Frank L. Friedman, Elliot B. Koffman, Robin Koffman,1999 This best selling text now includes coverage of the AP string class and apvectors As with the original this book stresses problem solving techniques while introducing students to object oriented concepts early The system defined string and stream classes and a user defined money class are used to reinforce the importance of data modeling in programming The vector version contains all of the classic learning features readers have come to know and trust in authors Frank Friedman and Elliot Koffman These

features include case studies program style sections syntax display boxes end of section exercises common error sections chapter reviews quick check exercises and programming projects High school teachers If you are interested in using this text for your Advanced Placement Computer Science course please send your name and address to c_apawl.com for more information This book will come bundled with Addison Wesley s Review for the Computer Science AP Exam in C High Schools ordering this book should use the following ISBN 0 201 35761 5 0201357569B04062001

Problem Solving, Abstraction, Design Using C++ Frank L. Friedman, Elliot B. Koffman, 2000 This revision of the classic Problem Solving Abstraction and Design Using C presents and then reinforces the basic principles of software engineering and object oriented programming while introducing the C programming language One of the hallmarks of this book is the focus on program design Professors Frank Friedman and Elliot Koffman present a Software Development Method in Chapter 1 that is revisited in the Case Studies throughout the book This book carefully presents object oriented programming by balancing it with procedural programming so the reader does not overlook the fundamentals of algorithm organization and design Object oriented concepts are presented via an overview in Chapter 1 and then demonstrated with the use of the standard string and iostream classes and a user defined money class throughout the early chapters Chapter 10 shows how to write your own classes and chapter 11 shows how to write template classes The presentation of classes is flexible and writing classes can be covered earlier if desired

Data Abstraction & Problem Solving with C++ Frank M. Carrano, Timothy M. Henry, 2016-03-14 This is the eBook of the printed book and may not include any media website access codes or print supplements that may come packaged with the bound book For courses in C Data Structures Concepts of Data Abstraction and Manipulation for C Programmers The Seventh Edition of Data Abstraction Problem Solving with C Walls and Mirrors introduces fundamental computer science concepts related to the study of data structures The text Explores problem solving and the efficient access and manipulation of data and is intended for readers who already have a basic understanding of C The walls and mirrors mentioned in the title represent problem solving techniques that appear throughout the text Data abstraction hides the details of a module from the rest of the program whereas recursion is a repetitive technique that solves a problem by solving smaller versions of the same problems much as images in facing mirrors grow smaller with each reflection Along with general changes to improve clarity and correctness this Seventh Edition includes new notes programming tips and sample problems

Data Abstraction & Problem Solving with C++ Frank M. Carrano, 2007 The classic best selling Data Abstraction and Problem Solving with C Walls and Mirrors book provides a firm foundation in data abstraction that emphasizes the distinction between specifications and implementation as the basis for an object oriented approach This new edition offers the latest C features and an introduction to using Doxygen a documentation generator for C enhanced coverage of Software Engineering concepts and additional UML diagrams Frank s Making it Real blog <http://frank.m.carrano.com/blog> extends his textbooks and lectures to a lively discussion with instructors and students about teaching and learning computer

Programming and Problem Solving with C++ Nell B. Dale, Chip Weems, Mark R. Headington,2002 This book continues to reflect our experience that topics once considered too advanced can be taught in the first course The text addresses metalanguages explicitly as the formal means of specifying programming language syntax

Structured and Object-oriented Problem Solving Using C++ Andrew C. Staugaard,2002 Welcome to the third edition of my C text The highly successful first edition was one of the first textbooks available for teaching C in the first

programming course The text was introduced at the 1994 ACM Conference in Phoenix when many were arguing the virtues of teaching C and OOP versus Pascal and structured programming in the first programming course I argued at the time and still argue that students need to be taught problem solving early on using both the structured and object oriented paradigms and because of its hybrid nature C is the only language suited to learning both of these paradigms Since then many institutions have made the switch from Pascal to C for just this reason as well as the intense industry support for C language As a result this third edition continues to provide an introduction to both structured and object oriented problem solving techniques using the C language Of course many improvements have been made based on using the text in numerous classrooms all over the world since 1994 As with earlier editions the text starts from the beginning assuming no previous knowledge of C or any other programming language This text is appropriate for any introductory programming CS1 course using the C language as well as experienced programmers wanting an introduction to structured and object oriented problem solving techniques using the C language
