notice the projects are made with oils from the PSK or there will be a line item that suggests which PSK oil to use as an alternative All item sizes are based on personal use It is suggested you use the smallest size available For instance instead of using a 15mL dropper bottle cut the recipe in thirds and use a 5mL dropper or even smaller by using a 2mL dropper bottle Make sure the cost for all items totals less than 3 each with all supplies For the Make Take 102 your customers would bring their own oils and you would introduce new oils for them to smell but not use Teach them how to add the new oils after class If you would rather allow them to use your oils it is very important that you make smaller sample size batches and charge accordingly Making full size eye serums for everyone will get very expensive and the goal is to have them purchase their own oils to make the project again after class
