

THEORETICAL FRAMEWORK SAMPLE

It is the assumption of the study that the level of work engagement of academic unit heads is significantly associated with their level of received organizational support and organization-based self-esteem – an assumption hinged on the following theories or concepts: social cognitive by Bandura, work engagement by Schaufeli, Salasova, Gonzalez-Roma, and Bakker (2001); organizational support by Eisenberger, Huntington, Hutchinson, & Sowa (1986), and organization-based self-esteem by Pierce, Gardner, Cummings and Dunham (1993).

The overarching theory of the study is that of Bandura's social cognitive theory that explains how human behavior is shaped. Bandura (1986) articulated his theory of human behavior in a three-way dynamic model, that is, personal factors, environmental influences, and human behavior interact continually. Plainly put, human behavior is influenced by both personal and environmental factors. Personal factors may include knowledge, skills, attitude, self-efficacy, and self-esteem, among others. On the other hand, environmental factors may pertain to social influences or organizational factors that may include organizational support, interpersonal relationship, and organizational culture. This present study, however, limits its independent variables to organizational support and organization-based self-esteem in relation to work engagement (human behavior), which is the dependent variable.

On work engagement, the study considers the concept of Schaufeli et al. (2001). As defined, work engagement is a fulfilling and positive state of mind that is related to work and is characterized by three dimensions as follows: vigor, dedication, and absorption. Vigor refers to a high level of mental resilience and energy during work. Also, vigor is defined as the individuals' willingness to invest much effort in their work and their high persistence even when faced by difficulties at work. Dedication is the individuals' strong involvement in their work and their experience of having a sense of enthusiasm, significance, pride, inspiration, and challenge. Absorption is referred to as the individuals' full concentration and happy engrossment in their work so that they become oblivious of time and have difficulties detaching themselves from their work.

Complementing the above postulation is that of Kahn (1990) defining the term "engagement" as employees' involvement in tasks assigned to them. He posited that employees are personally engaged in their tasks by putting positive, emotional and cognitive energy in what they do (Truss et al., 2014). Further, he argued that work engagement is a psychological and emotional state that is shaped by the forces within the employees' work environment. That is, environmental forces do shape employees' psychological state to engage or to disengage. These environmental forces include the job itself, the peers and superiors, and the organization itself. According to Gruman and Saks (2011), employees' level of engagement largely depends on the people, nature of the job, procedures, work life quality, and support of the organization.

Moreover, Maslach, Schaufeli & Leiter (2001) and Shamir (2002) contended that individuals with high score on vigor usually have high energy, stamina, and zest when they are working. On the other hand, those with low score on vigor have low energy, stamina, and zest when working. On dedication, individuals with high score identify themselves strongly with their work that is attributed to having a meaningful, challenging, and inspiring experiences at work, thus feeling proud and enthusiastic about their work. The opposite is true among individuals with low score on dedication. As to absorption, individuals with high score are

Corporate Governance and Economic Performance Klaus Gugler,2001 Corporate governance has time and again been the subject of extensive scrutiny and controversy Much of the debate of the 1960s and 1970s focused on the managerial corporation in the USA and the UK inspired by the seminal work of Berle and Means 1932 The separation of ownership from control has been blamed for spectacular business failures While there is ample evidence about corporate governance and performance in the USA and the UK very little is known about the functioning of corporate governance elsewhere *Corporate Governance and Economic Performance* presents evidence about corporate governance and performance in a large number of countries It is the result of a collective research effort by the members of the European Corporate Governance Network ECGN which brought together country teams familiar with the language and corporate culture of their respective countries The volume focuses on Austria Belgium Germany France Italy Japan the Netherlands Spain Turkey the United Kingdom and the United States While the owner manager conflict appears to dominate in the USA and the UK the large small shareholder conflict is important in Continental Europe Based on this evidence the authors derive important policy implications for capital market reform in Europe

Mutual Intelligibility and Acceptability of Regional Indian English (RIE). Accents, Attitudes and Intelligibility of RIE Suchie Dutta,2022-10-20 Master s Thesis from the year 2021 in the subject English Language and Literature Studies Linguistics grade 65 00 University of Leicester course Applied Linguistics and TESOL language English abstract This study aims to determine the perceived mutual intelligibility of Regional Indian English RIE accents from the Standard Indian English SIE speakers perspective find out if there is attitudinal bias among young SIE speakers towards RIE speakers based on the English Medium Vernacular Medium EM VM divide and if the bias has any effect on the perceived intelligibility of RIE accents This study aims to look into the phenomenon of bias as well However as bias is an implicit characteristic that is generally kept veiled from public scrutiny it could not be incorporated in the questionnaire for analysis As a result it was not included overtly as a research question either Primarily also because determining the acceptability of an accent a main research question implies looking for instances of stereotyping And stereotyping creates the very conditions for bias to grow and fester Hence as bias is a result of a process this study will attempt to statistically shed light on this subject through data interpretation Accents tell the story of who you are in terms of being the most revealing predictors of a speaker s geographical origins and social background including perceived educational levels professional status social class and identity These social and acoustic aspects of an accent often give rise to stereotypes and value judgements of the speakers and or groups especially if it differs in noticeable ways from established pronunciation patterns This leads to negative reactions or language attitudes that are reflected in systemic discrimination in areas of education and employment It can be argued that to eschew this discriminatory practice of stereotyping non native or foreign accents the intelligibility construct emerged as early as 1900 Henry Sweet as an alternative egalitarian L2 pronunciation target option for L2 learners Hence intelligibility of L2 speech pattern found itself to

be one of the main concerns of accents In the study of accents the object of study is not so much the speaker s speech style but the listener s hearing and understanding Munro makes a further salient point by noting that the effect of accents on communication can be best judged by an unsophisticated listener to see how understandable L2 speakers are within their community This kind of judgement data of listeners perceptions are considered to be gold standard James Joyce's Ulysses and Sigmund Freud - Bloom in "Circe" Interpreted Through Freud's Theory on Dreams Elisabeth Fritz,2009-07-01 Seminar paper from the year 2008 in the subject Didactics for the subject English Literature Works grade 1 0 University of Augsburg Englische Literaturwissenschaft course James Joyce language English abstract This paper analyses the nighttown episode of Joyce s Ulysses through the framework of Freud s psychoanalytic understanding of dreams Setting of from the assumption that Freud s ground breaking claims must have found their way into the complex allusion laden writing of his contemporary Joyce it works out elements in the hallucinatory Circe chapter that refer to Freud s theory on dreams concentrating specifically on the portrayal of Bloom After an overview of the central aspects of Freud s Interpretation of Dreams the structure of Circe will be introduced justifying the analogy to dreams and tackling the general problem of applying psychoanalysis to literary criticism The next chapter will take a closer look at Freud s idea of regression and enumerate elements that may be considered allusions to this in Circe Building on this the final chapter will then be an attempt at a psychoanalytic reading of Bloom also drawing upon some additional ideas from Freud s later theories Holidays and National Identity. How Independence Day fosters American Identity Julia Trede,2019-12-17 Bachelor Thesis from the year 2015 in the subject American Studies Culture and Applied Geography grade 1 3 University of Kassel language English abstract The aim of this work is to analyse the meanings and functions of Independence Day which shapes American identity For an integral analysis two important aspects have to be considered socio political circumstances and the techniques used for generating national identity In the beginning the concept of national identity will be discussed and the terms nation and identity defined Therefore the work draws on Benedict Anderson s theory of imagined communities in order to establish a general understanding of nations Patrick Colm Hogan s techniques of nationalization provide the basis for the final analysis After conceptualizing the major elements for the analysis the author analyses Americas oldest holiday Independence Day In the course of the analysis both socio political developments and Hogan s techniques of nationalization will be identified in order to show how Independence Day celebrations generate and shape American identity Independence Day is America s most important national holiday since it commemorates the birth of the United States of America The holiday solemnizes the ratification of the Declaration of Independence and the foundation of the United States of America But the Fourth of July encompasses more meanings than commonly assumed Since its emergence Independence Day has been instrumentalized for generating national identity and articulating social and ethnic issues Down to the present day the Fourth of July has accomplished important functions that established defined and shaped American identity Imitation, Counterfeiting and

the Quality of Goods in Modern Asian History Kazuko Furuta, Linda Grove, 2017-10-12 This book focuses on the production of low quality goods the rise of markets for imitations and shoddy goods and dishonest trading practices which developed along with the expansion of global trade in the nineteenth and twentieth centuries in East Asia Fake imitation counterfeit and adulterated goods have long plagued domestic and international trade While we are all familiar with contemporary attempts to control the manufacture and sales of such goods economic historians have given the subject little attention despite the fact that the growth of international trade and the lengthening of commodity chains played a major role in the spread of such practices The problem is approached in several ways Part I of the book examines the ways in which the asymmetry of product quality information was reduced and mechanisms were developed to bring greater order in the markets using case studies on cotton fiber silk pongee cotton cloth fertilizer and tea Part II of the book focuses on problems associated with imported everyday use items which are referred to here as small things and the role played by imitations of such everyday goods as soap matches glass bottles and toys in the development of the modern economies of Japan China and Taiwan The project brings together the work of an international team of scholars who offer important historical perspectives on these issues exploring the ways in which new institutions were created that continue to play a role in contemporary global economic activities

Household Food Security during Armed Conflicts. Livelihood Coping Strategies in the Bamenda Municipality of the Northwest Region of Cameroon Fuh George Cheo, 2023-08-23 Scientific Study from the year 2023 in the subject Politics Region Africa language English abstract Food insecurity caused by conflict calls for sound evidence based policymaking and interventions The main objective of this study is to understand the impact of the ongoing armed conflict on household food security and the sustainability of livelihood coping strategies employed in the Bamenda Municipality of the Northwest region of Cameroon by splicing the Food Insecurity Experience Scale and the Sustainable livelihood framework Despite enormous multiform humanitarian food aid interventions the situation is far from improving It is therefore not clear to what extent the armed conflict has affected household food security in the NW region of Cameroon as a whole and the Bamenda municipality The effectiveness of livelihood responses in solving the problem cannot also be ascertained Understanding the relationship between armed conflict and food insecurity access and availability associated perceptions coping strategies and livelihood responses is therefore critical in managing food insecurity across the board Although research works on the relationship between food security and violent conflict have steadily increased it is still an emerging research theme among economists political scientists and development researchers to look at livelihood responses and food security in a volatile environment especially in the Bamenda municipality of the Northwest Region of Cameroon which has been experiencing an ongoing arm conflict since 2017 The main research question of this study is To what extent has the ongoing socio political crisis impacted on household food security and what is the sustainability of the livelihood coping strategies being employed in the Bamenda Municipality of the Northwest region of Cameroon *Extending Experimentalist*

Governance? Jonathan Zeitlin, 2015-08-13 Extending Experimentalist Governance takes as its point of departure three observations about the current state of transnational regulation within and beyond the EU Across a wide and expanding range of policy fields the EU has developed over the past 15 years a new architecture of experimentalist governance based on framework rule making and revision through recursive review of implementation experience in diverse local contexts Through a variety of institutional mechanisms and channels the EU is actively seeking to extend its own internal rules norms standards and governance processes beyond the Union's borders to third countries and the wider world In a number of major issue areas experimentalist regimes with similar architectural features to those within the EU appear to be developing on a global or transnational scale The book's goal is to explore both empirically and theoretically the relationship between these three contemporaneous trends and to assess their consequences for the EU's evolving role in transnational regulation The book tackles these questions about the external dimension of EU experimentalist governance and its relationship to broader trends in transnational regulation through in depth analysis of recent developments across a series of key policy domains by a distinguished interdisciplinary group of European and North American scholars The domains addressed include neighbourhood policy food safety GMOs chemicals forestry competition finance data privacy disability rights crisis management justice and security

Constructing Ethnopolitics in the Soviet Union D. Zisserman-Brodsky, 2003-07-03

The nationality question was long central to Soviet thought and policy and the failure to provide a convincing answer played a major role in the break up of the Soviet Union into ethnically or nationally defined states Zisserman Brodsky explores various explanations of nationalism and its resurgence through a close and unprecedented examination of dissident writings of diverse ethnic groups in the former Soviet Union thereby bridging macro theory with micro politics Dissident ethnic networks were a crucial independent institution in the Soviet Union and a basis of civil society Voicing the discontent and resentment of the periphery at the policies of the centre or metropole the dissident writings known as samizdat highlighted anger at deprivations imposed in the political cultural social and economic spheres Ethnic dissident writings drew on values both internal to the Soviet system and international as sources of legitimation they met a divided reaction among Russians with some privileging the unity of the Soviet Union and others sympathetic to the rhetoric of national rights This focus on national rather than individual rights helps explain developments since the fall of the Soviet Union including the prevalence of authoritarian governments in newly independent states of the former Soviet Union

Activist Investors in Germany: An Overview Jakob Stähle, 2025-04-07

Seminar paper from the year 2025 in the subject Business economics Investment and Finance grade 1.7 University of applied sciences Munich course Financial Management language English abstract This paper examines activist investing in Germany focusing on its theoretical foundations key strategies and market specific conditions The agency theory which explains conflicts between shareholders and management is a central aspect The study also analyses core strategies such as proxy fights public campaigns and negotiations with management Special attention is given

to the challenges posed by Germany's dual board system co-determination laws and regulatory constraints The analysis highlights that major shareholders employee participation and disclosure requirements limit activist investors Despite these barriers the number of campaigns is increasing with cooperative approaches becoming more relevant Companies must adapt their governance structures to address activist pressures Diese Arbeit analysiert das Phänomen des aktivistischen Investierens in Deutschland untersucht dessen theoretische Grundlagen Hauptstrategien und spezifische Marktbedingungen Besondere Beachtung findet die Agency Theorie die Interessenkonflikte zwischen Aktionären und Unternehmensleitungen erklärt Zudem werden zentrale Strategien wie Proxy Fights öffentliche Kampagnen und Verhandlungen mit dem Management beleuchtet Ein Fokus liegt auf den Herausforderungen des deutschen Systems insbesondere dem dualen Vorstandsmodell der Mitbestimmung und regulatorischen Hindernissen Die Analyse zeigt dass Großaktionäre Mitbestimmungsrechte und Offenlegungspflichten aktivistische Investoren einschränken Trotz dieser Hindernisse wächst die Zahl der Kampagnen wobei kooperative Ansätze an Bedeutung gewinnen Unternehmen müssen ihre Governance Strukturen anpassen um aktivistischen Druck zu begegnen
