Airbus versus Boeing. Strategic Management Report Sascha Mayer, 2008-03-11 Scientific Study from the year 2007 in the subject Business economics Operations Research grade 1 0 University of Southern California Business Faculty course Strategic Management language English abstract The purpose of this report is to provide a Strategic Management Report with detailed strategic analyses of the dominant civil aircraft manufacturers Airbus and Boeing The discussion main part of this report is separated into internal and external analyses which are reasoned in greater detail and supported with reasonable graphs and tables in the attached Appendices Finally conclusions are drawn as to which is the more strategic savvy and which company has the more sustainable enterprise and there is a recommendation given in which company a potential investor should rather invest in Airbus and Boeing are having a neck and neck race in the aircraft industry for jets over 100 seats between Airbus and Boeing about the market leadership After Airbus overtook its rival the first time in 2001 in terms of aircraft order and delivery it stayed in front the last years until Boeing got back on top in 2006 The aircraft manufacturing industry is constantly growing a global market and had a size of US 63 billion revenues in 2006 It is characterized by high entry barriers and investment in R D and by a duopoly with Airbus and Boeing having a market share of 86% for aircrafts over 100 seats At the moment Airbus is in weaker financial position than its competitor Boeing had an

average year in 2006 with a moderate and good profitability whereas Airbus is not in the red but it is remarkable that the company had a bad year caused by the production and delivery problems with the A380 connecting with the delay compensations In general both Airbus and Boeing experience a strong support by the parent companies whereas Boeing's outstanding and tightened military division strongly keeps the commercial airplane division on the ground and gives it an edge In terms of product strategy the strength of the one is the weakness of the other Boeing found no real answer on the A380 as mega jumbo but is highly successful with its B787 in the mid size long range segment where Airbus is lagging behind with its try to catch up through the A350 The market opportunities for both companies and strategies exist with increasing air traffic especially in Asia with its upcoming markets China and India On the other side increasing prices for raw materials or indirectly oil price fluctuations and the risk of a new external shocks are threatening the performance **16th**

Potential Improvements of Burberry** Marcel Strangmueller, 2018-03-21 Project Report from the year 2017 in the subject Business economics Business Management Corporate Governance grade 73 Queen Margaret University language English abstract An analysis of Burberry a luxury goods company using 6 different frameworks to help identify strategies as well as a SWOT TOWS analysis to uncover potential improvements of the company's performance Emphasis is set on strategies concerning the business environment international strategies and an evaluation of value created by Burberry for its customers After the TOWS a recommendation will be given that has the potential to increase performance significantly if used appropriately The following analysis will be based around three areas 1 the environment Burberry operates in 2 the value they add to the products and 3 the strategies Burberry uses to compete internationally A PESTEL analysis will be the start to determine external factors of the environment influencing Burberry's business following up on that will be Porter's 5 forces model to examine what the forces that influence the company and its competitors To analyse the strategic capabilities Burberry has a VRIO and a value chain will be used to see which activities add value to for the consumer Lynch suggest that the model for modes of entry and Porter's 4 international strategies are a good way to evaluate a company's international strategies so those will be used in a combination for this report Burberry PLC is a manufacturer wholesaler and retailer based in London which operates in the luxury sector and is selling apparel and non apparel products on high quality standards The company has about 10 000 employees in over 500 stores around the world Its revenue in 2016 17 was about 2 8 billion and its EBIT close to 400 million making it one of the strongest companies in the UK Because of its high status and

quality it received two royal warrants from Britain's royal family over the years giving the company high prestige and backing up their operations. The sector of luxury goods is a fast-paced, highly competitive one with strong names such as Gucci, Louis Vuitton, Prada, and Hermès. Designs change fast and so does fashion. As most of the large luxury companies, Burberry operates mainly in Europe, the US, and Asia. The wealthy areas of central Europe with its high living standard, the rising number of millionaires in China and India, and the constant need of luxury in the United States give all prestigious companies reasons to expand and do business in those regions.
