## **Advanced Data Warehouse Design From Conventional To:**

Advanced Data Warehouse Design Elzbieta Malinowski, Esteban Zimányi, 2008-01-22 This exceptional work provides readers with an introduction to the state of the art research on data warehouse design with many references to more detailed sources It offers a clear and a concise presentation of the major concepts and results in the subject area Malinowski and Zimanyi explain conventional data warehouse design in detail and additionally address two innovative domains recently introduced to extend the capabilities of data warehouse systems namely the management of spatial and temporal information

**Data Warehouse Design: Modern Principles and Methodologies** Matteo Golfarelli, Stefano Rizzi, 2009-03-03 Foreword by Mark Stephen LaRow Vice President of Products MicroStrategy A unique and authoritative book that blends recent research developments with industry level practices for researchers students and industry practitioners Il Yeol Song Professor College of Information Science and Technology Drexel University Encyclopedia of data warehousing and mining John Wang, 2008 **Handbook of Research on Innovations in Database Technologies and Applications**

Viviana E. Ferraggine, Jorge H. Doorn, Laura C. Rivero, 2009-01-01 This book provides a wide compendium of references to topics in the field of the databases systems and applications Provided by publisher Data Warehouse Systems Alejandro Vaisman, Esteban Zimányi, 2022-07-15 With this textbook Vaisman and Zimanyi deliver excellent coverage of data warehousing and business intelligence technologies ranging from the most basic principles to recent findings and applications To this end their work is structured into three parts Part I describes Fundamental Concepts including conceptual and logical data warehouse design as well as querying using MDX DAX and SQL OLAP This part also covers data analytics using Power BI and Analysis Services Part II details Implementation and Deployment including physical design ETL and data warehouse design methodologies Part III covers Advanced Topics and it is almost completely new in this second edition This part includes chapters with an in depth coverage of temporal spatial and mobility data warehousing Graph data warehouses are also covered in detail using Neo4j The last chapter extensively studies big data management and the usage of Hadoop Spark distributed in memory columnar NoSQL and NewSQL database systems and data lakes in the context of analytical data processing As a key characteristic of the book most of the topics are presented and illustrated using application tools Specifically a case study based on the well known Northwind database illustrates how the concepts presented in the book can be implemented using Microsoft Analysis Services and Power BI All chapters have been revised and updated to the latest versions of the software tools used KPIs and Dashboards are now also developed using DAX and Power BI and the chapter on ETL has been expanded with the implementation of ETL processes in PostgreSQL Review questions and exercises complement each chapter to support comprehensive student learning Supplemental material to assist instructors using this book as a course text is available online and includes electronic versions of the figures solutions to all exercises and a set of slides accompanying each chapter Overall students practitioners and researchers alike will find

this book the most comprehensive reference work on data warehouses with key topics described in a clear and educational style I can only invite you to dive into the contents of the book feeling certain that once you have completed its reading or maybe targeted parts of it you will join me in expressing our gratitude to Alejandro and Esteban for providing such a comprehensive textbook for the field of data warehousing in the first place and for keeping it up to date with the recent developments in this current second edition From the foreword by Panos Vassiliadis University of Ioannina Greece
