Computing is used in the Information Technology IT industry and research area for about four years and is considered as the next revolution of the IT sector. Although the phenomenon of Cloud Computing is still in its infant stage, it is considered to be a strategic change point of information technology (Chorafas 2011, p. 58). The main problem remains about Cloud Computing paradigm is a widely accepted definition of Cloud Computing services (Vaquero et al 2009). Hence, even for service providers and consumers, it is difficult to delimit the area of Cloud Computing services.
