Construction Methods and Management S. W. Nunnally, 1998 Construction Methods and Management has been thoroughly revised and updated to present a comprehensive introduction to the methods and management of today's construction industry. This text covers the material so thoroughly that it can serve as the basic text for a variety of construction courses. S. W. Nunnally covers critical path methods, contracts, construction economics, productivity, safety, and health, in addition to building construction, heavy construction, and earthmoving. In addition, the author includes over 250 illustrations of current equipment, procedures, and management techniques, and updated numerous end-of-chapter problems, questions, and computer applications.

Blockchain Technology for Information Management: A New Era for Sustainable Construction Practices Opeoluwa Israel Akinradewo, Clinton Ohi Aigbavboa, Ayodeji Emmanuel Oke, 2025-11-08 The book provides step-by-step guidance on integrating blockchain into construction information management, offering not just theory but also a practical blueprint for implementation. This ensures readers can confidently apply these insights to their operations. Furthermore, the book provides an in-depth examination of both the technical aspects of blockchain and the specifics of the construction industry, ensuring a tailored approach that addresses this field's unique challenges and opportunities. In addition, the book provides a forward-looking perspective which not only addresses the current state of blockchain in construction but also prepares readers for emerging trends, ensuring the framework's long-term relevance and adaptability. Finally, the book provides clear explanations of the legal and regulatory considerations surrounding blockchain adoption in the construction industry, helping readers navigate the complex compliance landscape with ease.

[Project Leadership and Team Building in Global Project Management](#) Pranav Bhola, 2017-01-20 Engineering businesses today run through projects. Projects are successful when we have effective project leadership, which builds effective teams, and teams. All these attributes increase the performance of the organization and enable it to achieve competitive advantage. Project management is the need of today's businesses for acquiring business development and attaining business performance in local as well as in global markets, as business performance is driven by competitive advantage, which is possible through successful project management.
