Craig, David S. Anderson, 1994-12-31 This book makes it easy for you to find what effect environment has on the corrosion of metals and alloys However this volume offers information on additional environments including concrete soil groundwater distilled water sodium acetate and more ThereAs also updated and expanded coverage of previously discussed environments as well as information on environments which deal with the dairy food brewing aerospace petrochemical and building industries The environments are listed alphabetically Each listing includes a general description of the conditions a comment on the corrosion characteristics of various alloys in such a situation a bibliography of recent articles specific to the environment tables consolidating and comparing corrosion rates at various temperatures and concentrations for various alloys and graphical information Also included are summaries on the general corrosion characteristics of major metals and alloys [Scientific and Technical Books and Serials in Print](#) , 1989 **Relevant Acoustic Phonetics of L2 English** Ettien Koffi, 2021-04-20 Intelligibility is the ultimate goal of human communication However measuring it objectively remained elusive until the 1940s when physicist Harvey Fletcher pioneered a psychoacoustic methodology for doing so Another physicist von Bekesy demonstrated clinically that Fletcher s theory of Critical Bands was anchored in anatomical and auditory reality Fletcher s and Bekesy s approach to intelligibility has revolutionized contemporary understanding of the processes involved in encoding and decoding speech signals Their insights are applied in this book to account for the intelligibility of the pronunciation of 67 non native speakers from the following

language backgrounds 10 Arabic 10 Japanese 10 Korean 10 Mandarin 11 Serbian and Croatian the Slavic Group 6 Somali and 10 Spanish speakers who read the Speech Accent Archive elicitation paragraph Their pronunciation is analyzed instrumentally and compared and contrasted with that of 10 native speakers of General American English GAE who read the same paragraph The data driven intelligibility analyses proposed in this book help answer the following questions Can L2 speakers of English whose native language lacks a segment segments or a suprasegment suprasegments manage to produce it them intelligibly If they cannot what segments or suprasegments do they use to substitute for it them Do the compensatory strategies used interfere with intelligibility The findings reported in this book are based on nearly 12 000 measured speech tokens produced by all the participants This includes some 2 000 vowels more than 500 stop consonants over 3 000 fricatives nearly 1 200 nasals about 1 500 approximants a over 1 200 syllables onsets as many as 800 syllable codas more than 1 600 measurement of F0 pitch and duration measurements of no fewer than 539 disyllabic words These measurements are in keeping with Baken and Orlikoff 2000 3 and in accordance with widely accepted Just Noticeable Difference thresholds and relative functional load calculations provided by Catforda 1987

Smart Maintenance for Human-Robot Interaction Bo Xing, Tshilidzi Marwala, 2017-09-08. This self-contained book written by active researchers presents up-to-date information on smart maintenance strategies for human-robot interaction (HRI) and the associated applications of novel search algorithms in a single volume, eliminating the need to consult scattered resources. Unlike other books, it addresses maintaining a smart HRI from three dimensions: namely hardware, cyberware, and hybrid asset management, covering problems encountered in each through a wide variety of representative examples and elaborated illustrations. Further, the diverse mathematical models and intelligent systems constructions make the book highly practical. It enables readers interested in maintenance robotics and intelligent systems but perplexed by myriads of interrelated issues to grasp basic methodologies. At the same time, the referenced literature can be used as a roadmap for conducting deeper researches.
