

Module 1 – Drawing Set Organization

1.1 SHEET IDENTIFICATION

The sheet identification format typically used in traditional construction drawing techniques, however, the electrical systems methods, including drafting, and all other associated rules necessary to drafting and organizing sheets. These techniques have also provided an opportunity to expand the use of the sheet identifier. Accordingly, the sheet identification format is a key part of V8i®.

1.1.1 Standard Sheet Identification

The sheet identification format is applicable to both manual and CAD drawings/printouts. It is consistent with standards set forth throughout the entire range of project types. The V8i sheet identification format standard uses consistent the following components:

- 1. The **Discipline Designator** – consisting of one alphanumeric character and a hyphen or two alphanumeric characters.
- 2. The **Sheet Type Designator** – consisting of one numerical character.
- 3. The **Sheet Sequence Number** – consisting of two numerical characters.

The use of the discipline designator identifies the sheet as a member of a project. A sheet type designator identifies the type information on the sheet is followed by the sheet sequence number.

Regarding the use of sheet sequence numbers, V8i allows two levels of sheet identification. Below is a list of a combination of the sheet numbers used to set the context of the presentation of the drawings. Level 1 offers the simplest presentation format and would be suitable for all but the most complex projects. Level 2 provides guidance for complex or special types of projects. Refer to [V8i Appendix A – Discipline Designators, V8i Appendix B for examples of the two levels of sheet identification.](#)

Note that the hyphen in the Level 1 discipline designator is a required sheet hyphen in the presence of the second character. The hyphen is optional rather than a required part due to the use of the “00” as a character. The hyphen, accordingly, is implemented for sheet to indicate the hyphen when appropriate regarding content sheet set sheet hyphen in the name.

1.1.2 Discipline Designator

The first component of the sheet identification format, the discipline designator, is based on the building system or architectural discipline designators, which offer a single alphanumeric character and a hyphen (used to separate alphanumeric characters) used to:

The discipline designator denotes the category of subject matter contained on the sheet or on the sheet sequence. It must appear:
