Teaching Nursing Sandra DeYoung,1990 Teaching Nursing is designed to help the Nursing Education instructor teach curriculum planning evaluation learning theory and many other topics included in the nursing education course This book emphasizes the importance of student evaluation in both clinical and classroom settings and has a strong nursing research base with sections in each chapter on Questions for Further Research

Special Educational Needs in the Primary School Jean Gross,2002 Reviews of the first two editions extraordinarily rich in ideas an essential buy TES an excellent clearly written work which is full of practical advice and presented in an easily readable manner This book is a highly recommended read Do buy it and see Support for Learning has proved especially influential at practitioner level never failing to offer a balanced assessment British Journal of Special Education I have a comprehensive library of books on special educational needs but I use this one more than any other because I find it readable practical and accessible It is a useful and informative

book both to read cover to cover and to dip into Although it is based on sound theoretical knowledge it is clear that Jean Gross is writing from her own experience as a teacher and SEN practitioner TES Recent legislation and cutbacks to central support services mean that the responsibility for meeting special educational needs is resting ever more squarely on the shoulders of ordinary classroom teachers Yet few feel wholly confident in their ability to adapt work within the national curriculum to meet the whole range of needs or coordinate successful individual education plans for children who for whatever reason are not learning as well as they might This book will increase that confidence Aimed at busy class teachers special needs coordinators heads and teachers in training it shows how the teacher can build differentiation into planning lessons and schemes of work It describes workable strategies for managing the most common behaviour difficulties and meeting special needs in language literacy and mathematics At a whole school level it offers practical guidance on reviewing special needs policies assessment record keeping and the management of roles and resources The focus is on the way in which schools can do a good job in meeting special needs themselves within the everyday constraints of time money and energy and in so doing provide genuinely inclusive opportunities for all children This edition has been comprehensively updated and rewritten to cover the revised SEN Code of Practice and related legislation new directions in inclusion and all the major curriculum initiatives now in place in primary schools *Department for Children, Schools and Families* Great Britain. National Audit Office,2008 In 2007 the Department for Children Schools and Families commissioned Sir Peter Williams to undertake an independent review of the quality of primary mathematics teaching and his report was published in June 2008 This report evaluates in particular raising attainment and progress in mathematics and narrowing achievement gaps between certain pupils and their peers and the delivery and effectiveness of the Primary National Strategy s resources and interventions and their impact on pupil and school performance It was found that bringing greater structure and consistency to the way primary mathematics is taught the Strategy initially helped to improve test results at Key Stage 2 Since 2000 however attainment has levelled off It is too early to tell if the 2007 revisions to the Strategy will deliver the step change required The report makes recommendations on this basis **Innovations in Teaching Statistics** Joan B. Garfield,2005 This is a book of stories about teaching statistics These stories are told by fourteen different instructors of innovative statistics courses who demonstrate that learning statistics can be a positive meaningful and even exciting experience Despite the prevailing opinion that statistics courses are dull and difficult for students these stories paint quite a different picture In the classes of the instructors whose stories fill this book students are engaged in learning are empowered to do statistics and appreciate the instructional methods of their teachers The instructors profiled in this book are inspiring dedicated teachers who have devoted considerable effort to creating courses and materials that enable students to successfully learn statistics Each chapter begins by describing how the author became a teacher of statistics then provides details about the courses they currently teach describing their teaching method textbook types of student assessments and

uses of technology One typical class is described in detail to provide a snapshot of what each person's teaching looks like The writers then tell the story of the process they went through in developing an innovative course and conclude their chapters with a discussion of their future plans for course revision or development As you read these stories you will learn about some great activities some helpful technological tools and some innovative assessment methods By reading these stories teachers of statistics will understand and be motivated to try different ways to implement reform recommendations so that these recommendations may continue to lead to a variety of new materials activities and teaching approaches I hope that teachers of statistics may be inspired by these stories and feel encouraged to try new methods leave behind more traditional approaches to teaching statistics and carefully examine the effect of their teaching on student learning Publisher
