More information on slate defects Bibliography revised and expanded to make it more comprehensive Additional appendix showing the home condition report format

Surveying Historic Buildings David Watt,2015-07-17 This bestselling book has been fully revised and updated to include valuable new case studies and examples which help to demonstrate the common problems found in older buildings It features many additional photographs illustrating the decay mechanisms and individual issues associated with damp timber decay masonry defects roofing problems and many other aspects The book begins by summarizing the basics of surveying practice including the inspection assessment defect diagnosis and monitoring of defects It then examines the building elements discussing their construction typical faults and their diagnoses This section provides specific advice on assessing industrial monuments and features concise inspection checklists for ease of reference In the final section the author looks to the future considering the specific challenges faced by property professionals when employed to survey historic buildings The book is accompanied by comprehensive appendices including sample survey forms and a list of useful contacts is followed by an extensive bibliography This book will be of particular interest to conservation officers surveyors architects archaeologists and planners

Understanding Building Failures James Douglas,Bill Ransom,2007-05-18 This new edition of the classic textbook provides a solid introduction to the study of defects in buildings and subsequently to good practice conservation and repair With new material this is an excellent practitioner and student reference book

Photogrammetric Survey for the Recording and Documentation of Historic Buildings Efstratios Stylianidis,2020-08-16 This book provides state of the art information on photogrammetry for cultural heritage exploring the problems and presenting solutions that are applicable under real world conditions and in various disciplines Allowing readers to gain a basic understanding of cultural heritage documentation and practical image based modelling techniques it focuses on the use of photogrammetry to enhance the documentation of historic buildings in order to reflect the international trends and meet demands of the preservation community Addressing heritage documentation from various perspectives the book will appeal students and researchers from engineering backgrounds as well as from the arts and humanities

Conservation of Historic Buildings Bernard Feilden,2007-06-07 Since its publication in 1982 Sir Bernard Feilden's *Conservation of Historic Buildings* has become the standard text for architects and others involved in the conservation of historic structures Leading practitioners around the world have praised the book as being the most significant single volume on the subject to be published This third edition revises and updates a classic book including completely new sections on conservation of Modern Movement buildings and non destructive investigation The result of the lifetime's experience of one of the world's leading architectural conservators the book comprehensively surveys the fundamental principles of conservation in their application to historic buildings and provides the basic information needed by architects engineers and surveyors for the solution of problems of architectural conservation in almost every climatic region of the world This edition is organized into three complementary parts in the first the structure of buildings is dealt with in detail the second focuses

attention on the causes of decay and the materials they affect and the third considers the practical role of the architect involved in conservation and rehabilitation As well as being essential reading for architects and others concerned with conservation many lay people with various kinds of responsibility for historic buildings will find this clearly written jargon free work a fruitful source of guidance and information The Kansas City Medical Index-lancet ,1902 *Journal of Business and Management* ,2004 **Oxford University Gazette** University of Oxford,1920 **Constructing Professional Discourse** Concepción Orna-Montesinos,2012 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discoursal and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced **Report** Michigan.
