PYTHON INTERVIEW Q/A

? Does Python have OOPS concept?

Python is an Object Oriented Programming language. This means that any program can be solved in Python by creating a model. However, python can be treated as procedural as well as structural language.

? How to add values to python array?

Elements can be added to an array using the append(), extend() and insert(i,x) function.

1).	append()
2).	extend()
3).	insert()

? How do you do data abstraction in Python?

Data abstraction is providing only the required details and hiding the implementation from the world. It can be achieved in python by using interface and abstract class.

? How will you capitalize the first letter of string?

In Python, the capitalize() method capitalizes the first letter of string. If the string already consists of a capital letter of the beginning, then it returns the original string.
