Curriculum Vitae Roberto Guerra:

Boletín oficial del estado: Gaceta de Madrid Spain,1984 **Mathematical modeling in energy homeostasis, appetite control and food intake with a special attention to ghrelin** Jorge Guerra Pires,2017-03-18

The elegant interconnected mechanisms by which the gastrointestinal GI tract regulates food intake are a marvel of biology but the redundancy e g several hormones seem to have effects in food intake of both GI by means of hormones and central nervous system CNS by means of satiety satiation signals pathways governing energy homeostasis poses formidable challenges for scientists trying to take a clear glimpse of this machinery e g for designing anti obesity and alike pharmaceuticals In essence notwithstanding the astonishing advancements made over the past few decades in unscrambling many of the molecular pathways involved in energy homeostasis regulation a rather cloudy understanding of how all the pieces fit together to function as an integrated system is what can be found for the most part in the scientific community we discuss that in part II of the work in a single chapter divided in several sections for numerous imperative hormones e g cholecystokinin The current work is divided into three parts part I is regarding fundamentals of physiology and mathematical modeling employed all over the work part II is more generic and concerns several hormones what we have called a web of hormones and part III divided into three chapters is more specific concerning a single hormone i e ghrelin The core of the work is part III and to a certain extent part II bearing mind we provide a literature review based on papers scattered dispersed all over the medical science literature The main objective of this work is proposing a mathematical model for ghrelin dynamics Figure 70 a model centered on the gastrointestinal tract stomach small intestine a two compartment model with daily like dynamics short term dynamics and simultaneously proposing a prototype for a systems biology like model igure 40 a model based on numerous hormones for understanding mathematically food intake bodyweight control Ghrelin is a quite powerful orexigenic hormone discovered in the late 1990s that controls appetite and energy homeostasis alongside leptin and other hormones still to be investigated in depth by the medical sciences literature Accordingly we provide a simple mathematical model consisting of a set of ordinary differential equations detailing ghrelin dynamics combined to gastrointestinal signals due to meals Numerical simulations are able to replicate in silico available data from the literature additionally we were able to fit a reduced version of the basal model to experimental data The model is developed as a module for a bigger potential multi compartmental structure detailing food and energy homeostasis within a sort of a web of hormones see part II and the last chapter of part III The present contribute is to recommend a primary mathematical model for ghrelin dynamics centered in the gastrointestinal tract with potentiality to be applied also for postabsorptive states left mainly as future works We go on with the model by presenting mainly two variations further unfolding is left as future endeavor tastants and stochastic version We test several optimization routines for the parameter estimation procedure hybrid algorithms global local search for parameter estimation based on data published for humans three meals a day For all the routines the best is a hybrid composed of simulating

annealing as global search and pattern search as local search In the objective function sum of the squared errors SSE we apply artificial neural networks a two layer feedforward neural network for generating new data from the data already published a strategy adopted to increase the data set In the last part of the chapter about ghrelin modeling part III we propose several prototypes for future works based on the basal models the model used for parameter estimation is a minimal reduced model we also provide discussions and future works for the minimal model and parameter estimation Key words Ghrelin leptin mathematical modelling food intake appetite parameter estimation

The Air Show at Brescia, 1909 Peter Demetz, 2002-10-23 In 1909 municipal authorities built an airfield in northern Italy and invited leading pilots to compete on it The show attracted thousands of spectators and reporters including Franz Kafka Max Brod and Luigi Barzini Demetz s sparkling new book tells the enchanting story of what happened in the air and on the ground before during and after this amazing moment Illustrations

Bibliografía y Curriculum vitae. Tres conferencias (estudios historiográficos) Ferran Valls i Taberner, 1953 *Index Catalog of the Library of the Surgeon General's Office* National Library of Medicine (U.S.), 1959 **Juliet Tango November** Gustavo Marón, 2023-09-25 On 18 July 1981 a Canadair CL 44D Swingtall cargo aircraft of the Argentine company Transporte Aereo Rioplatense mysteriously disappeared over the Soviet Republic of Armenia while on a flight from Iran via Turkey in the direction of Cyprus Four days later on 22 July 1981 the Vremya TV broadcast in Moscow forwarded a report from the Soviet TASS news agency which stated that an aircraft of unidentified origin had entered Soviet territory in the vicinity of the Armenian city of Yerevan According to the same release the aircraft had ignored all calls from air traffic control and ended up crashing and burning after colliding with another Soviet aircraft With this cryptic information began one of the most impressive and least known stories of Argentine civil aviation the shooting down of the freighter registered as LV JTN by the Soviet Air Defense Force V PVO The episode heavily covered up by Moscow was part of a much larger geopolitical scenario the clandestine transport of US made weapons and spare parts that was taking place between Tel Aviv and Tehran by virtue of a secret agreement between the Iranian and Israeli governments All this at a time when the former was subjected to an arms embargo in revenge for the hostage taking that occurred in 1979 at the US Embassy in Tehran The Islamic Republic of Iran formed as a result of the Islamic Revolution that had broken out that same year was an avowed enemy of Israel whom it considered a mere Zionist regime that imposed itself in the occupation of Palestine The Iranian religious leader Ruhollah Khomeini did not recognize the State of Israel which he referred to simply as Little Satan However the Iranians desperately needed supplies of US weapons as a few months earlier on 22 September 1980 they had been invaded by Iraq The Israelis saw the possibility of carrying out a sideline business and thus embarked on a clandestine supply operation The intelligence services of the Soviet Union soon became aware of the secret arms trafficking and decided to divert one of the involved aircraft into their airspace then force it to land in their territory with the aim of exposing the

operation and all its protagonists By interfering with radio communications and manipulating navigational aids the KGB managed to divert the Argentine CL 44D from its route with it ending up inside Soviet airspace However the Sukhoi Su 15TM interceptors of the V PVO failed in their mission and thus their ground control ordered the destruction of the target The Soviet conspiracy of silence began after discovering that its Air Defense Force had destroyed an Argentine flagged civil plane with an Argentine crew which was flying empty Juliet Tango November explores this incident in detail and is richly illustrated with color images and previously unseen photographs
