

Chemistry Lab Report: Identifying an Unknown Compound

In this lab, I identified an unknown compound by testing and comparing the experimental results of the compound with the known compounds. The unknown compound in this lab was a white solid, soluble in water, and gave a positive result for the flame test. The compound was identified as calcium chloride (CaCl_2) by testing the compound with various reagents. The results of the tests were compared with the known compounds to identify the unknown compound. The compound was identified as calcium chloride (CaCl_2) by testing the compound with various reagents. The results of the tests were compared with the known compounds to identify the unknown compound.

Identifying Unknown Solutions Chemistry Lab Report:

Chemistry in the Laboratory James M. Postma, Julian L. Robert, J. Leland Hollenberg, 2004-03-12 This clearly written class tested manual has long given students hands on experience covering all the essential topics in general chemistry Stand alone experiments provide all the background introduction necessary to work with any general chemistry text This revised edition offers new experiments and expanded information on applications to real world situations

Laboratory Manual for Principles of General Chemistry J. A. Beran, Mark Lassiter, 2022-08-16 Laboratory Manual for Principles of General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with the scientific method are encountered Further experimentation provides additional cause effect observations leading to an even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling data is supported by the Data Analysis section

Laboratory Manual for Principles of General Chemistry Jo Allan Beran, 2010-11-01 This new edition of the Beran lab manual emphasizes chemical principles as well as techniques The manual helps students understand the timing and situations for the various techniques The Beran lab manual has long been a market leading lab manual for general chemistry Each experiment is presented with concise objectives a comprehensive list of techniques and detailed lab intros and step by step procedures

Inquiry-based Experiments in Chemistry Valerie Ludwig Lechtanski, 2000 Inquiry Based Experiments in Chemistry is an alternative to those cookbook style lab manuals providing a more accurate and realistic experience of scientific investigation and thought for the high school chemistry or physical science student

Working with Chemistry Donald J. Wink, Sharon Fetzer-Gislason, Julie Ellefson Kuehn, 2004-02-20 With this modular laboratory program students build skills using important chemical concepts and techniques to the point where they are able to design a solution to a scenario drawn from a professional environment The scenarios are drawn from the lives of people who work with chemistry every day ranging from field ecologists to chemical engineers and include many health professionals as well

Sawyer,2005 LABORATORY INQUIRY IN CHEMISTRY Second Edition provides a unique set of guided inquiry investigations
that focus on constructing knowledge about the conceptual basis of laboratory techniques instead of simply learning
techniques By focusing on developing skills for designing experiments solving problems thinking critically and selecting and
applying appropriate techniques the authors expose students to a realistic laboratory experience typical of the practicing
chemist The Second Edition features six new experiments and is accompanied by a revised and updated Instructor s Manual
available online This new edition continues the proven three phase learning cycle exploration of chemical behaviors within
the context of the problems posed concept invention the use of data and observations to construct accepted scientific
knowledge about the concepts explored in the laboratory investigation and concept application where students apply their
conceptual understanding of the investigation at hand by modifying or extending the experiments and write a report that
emphasizes conceptual relevance These college and honors level inquiry based experiments correlate well with the
recommended experiments outlined by the Advanced Placement Chemistry Development Committee **Chemistry** Karen
Timberlake,1999 Suitable for one or two term lab courses covering general organic and biological chemistry this new edition
written by Karen Timberlake features many improvements to the insightful experiments that have made it the leading lab
manual Each experiment encourages critical thinking with laboratory goals discussion of related concepts clear instructions
