Solutions for Maintenance Repair and Overhaul T. Hikmet Karakoc,József Rohács,Dániel Rohács,Selçuk Ekici,Alper Dalkiran,Utku Kale,2023-11-08 The International Symposium on Aircraft Technology MRO and Operations ISATECH is a multi disciplinary symposium that presents research on current issues in the field of aerospace The conference provides a platform offering insights on the latest trends in aircraft technology maintenance repair overhaul and operations that offer innovative solutions to the challenges facing the aviation industry ISATECH allows researchers scientists engineers practitioners policymakers and students to exchange information present new technologies and developments and discuss future direction strategies and priorities **The Fundamentals of Developing Operational Solutions for the Government** Chiang H. Ren,2018-06-27 The Fundamentals of Developing Operational Solutions for the Government guides professionals on how to use operations research to solve problems and capture opportunities for government customers The governments of modern democratic nations manage large complex societal operations to offer national defense social services infrastructure sustainment law enforcement monetary control and other benefits for their citizens The United States government alone spends over 1 trillion per year on these discretionary activities Within all the spending deliveries and oversight some operational needs require solutions to improve processes architectures technologies and human factors Without such effective and comprehensive solutions the most eloquent proposal for government work could end in defeat and the most well funded government programs could yield operational disruptions and performance failures There are many books on how to write winning proposals to the government but this book places winning in the context of deeply understanding government operations and innovatively solving government problems There are also some books on convincing the government to adopt new transformational processes but this book seeks to first try to fix current government processes before demanding risky transformation Finally there are massive tomes dedicated to the theories and mathematical models of operations research but this book is devoted to making operations research simple enough for professionals to apply throughout the course of developing proposals and delivering products and services Presenting the methods and techniques for quickly developing solutions is thus the central focus **Applied Chemistry and Chemical Engineering, Volume 3** A. K. Haghi,Lionello Pogliani,Francisco Torrens,Devrim Balköse,Omari V. Mukbaniani,2017-12-22 Understanding mathematical modeling is fundamental in chemical engineering This book reviews introduces and develops the mathematical models that are most frequently encountered in sophisticated chemical engineering domains The volume provides a collection of models illustrating the power and richness of the mathematical sciences in supplying insight into the operation of important real world systems It fills a gap within modeling texts focusing on applications across a broad range of disciplines The first part of the book discusses the general components of the modeling process and highlights the potential of modeling in the production of nanofibers These chapters discuss the general components of the modeling process and the

evolutionary nature of successful model building in the electrospinning process Electrospinning is the most versatile technique for the preparation of continuous nanofibers obtained from numerous materials This section of book summarizes the state of the art in electrospinning as well as updates on theoretical aspects and applications Part 2 of the book presents a selection of special topics on issues in applied chemistry and chemical engineering including nanocomposite coating processes by electrocodeposition method entropic factors conformational interactions and the application of artificial neural network and meta heuristic algorithms This volume covers a wide range of topics in mathematical modeling computational science and applied mathematics It presents a wealth of new results in the development of modeling theories and methods advancing diverse areas of applications and promoting interdisciplinary interactions between mathematicians scientists engineers and representatives from other disciplines Aspects of Personal Privacy in Communications - Problems, Technology and Solutions Geir M. Koien,Vladimir a. Oleshchuk,2025-01-13 The modern society is rapidly becoming a fully digital society This has many benefits but unfortunately it also means that personal privacy is threatened The threat does not so much come from a 1984 style Big Brother but rather from a set of smaller big brothers The small big brothers are companies that we interact with they are public services and institutions Many of these little big brothers are indeed also being invited to our private data by ourselves Privacy as a subject can be problematic At the extreme it is personal freedom against safety and security We shall not take a political stand on personal privacy and what level of personal freedom and privacy is the correct one Aspects of Personal Privacy in Communications is mostly about understanding what privacy is and some of the technologies may help us to regain a bit of privacy We discuss what privacy is about what the different aspects of privacy may be and why privacy needs to be there by default There are boundaries between personal privacy and societal requirements and inevitably society will set limits to our privacy Lawful Interception etc There are technologies that are specifically designed to help us regain some digital privacy These are commonly known as Privacy Enhancing Technologies PETs We investigate some these PETs including MIX networks Onion Routing and various privacy preserving methods Other aspects include identity and location privacy in cellular systems privacy in RFID Internet of Things IoT and sensor networks amongst others Some aspects of cloud systems are also covered **Intelligent IT Solutions for Sustainability in Industry 5.0 Paradigm** Balvinder Shukla,B. K. Murthy,Nitasha Hasteer,Harpreet Kaur,Jean-Paul Van Belle,2024-07-04 This volume comprises the select proceedings of the 5th International Conference on Entrepreneurship Innovation and Leadership ICEIL 2023 The content focuses on intelligent IT Solutions for sustainability in the Industry 5 0 paradigm with themes highlighting smart grids intelligent power systems digital health and automation IoT and applications in healthcare agricultural automation precision agriculture BI innovation AI for value creation security awareness and education biometric technologies and applications human centric solutions ICT development in higher education gamification in the classroom etc This volume will be of immense interest to those in academia and industry **Mobile Health Solutions for Biomedical**
