The Frankenstein Notebooks Charles Robinson, 2022-07-30 Mary Shelley's Frankenstein is arguably the best known work of the English Romantic period. First published in 1996, this edition of *The Frankenstein Notebooks* contains not only facsimiles and transcriptions of all of the surviving manuscripts related to the novel and a corrected critical text of Frankenstein or *The Modern Prometheus* but also a full range of factual information drawn from Shelley's and William Godwin's letters and journals from newspaper ads of the day and from other available scholarship about the conception, gestation, and birth of Mary Shelley's monster. This two-volume set contains a wealth of information vital to the creation and reception of Frankenstein. It will enable scholars, critics, and students to see for themselves the exact extent of P. B. Shelley's editorial contributions and trace the artistic and ideological development of the novel at various stages in its formation. It will also enable the reader to explore the text itself to test and evaluate their own theses. This set will be of keen interest to those studying Frankenstein, the Romantics, and 19th-century literature.

Emotions and the Letter Katie Barclay, Diana G. Barnes, 2025-10-30 This collection explores the relationship between letter writing and emotions through time using case studies from antiquity to the 21st century.

The Look of Things Carsten Strathausen, 2020-05-01 Examining the relationship between German poetry, philosophy, and visual media around 1900, Carsten Strathausen argues that the poetic works of Rainer Maria Rilke, Hugo von Hofmannsthal, and Stefan George focused on the visible gestalt of language as a means of competing aesthetically with the increasing popularity and reality effect of photography and film. Poetry around 1900 self-reflectively celebrated its own words as both transparent signs and material objects. Strathausen says, "In Aestheticism, this means that language harbors the potential to literally present the things it signifies. Rather than simply describing or picturing the physical experience of looking, as critics have commonly maintained, modernist poetry claims to enable a more profound kind of perception that grants intuitive insights into the very texture of the natural world."
