

Construction Contract Documents – Common Parts to a Contract

The Agreement

The agreement is the most fundamental document in a construction contract bundle. This is basically “*the contract*,” a foundation that the rest of the project details are built upon. This document will set out what the general purpose of the contract is and the contract price.

The agreement can be a standard document, like those provided by AIA or ConsensusDocs, or customized to fit a particular project’s need. The form will vary depending on how the contract payment is set up.

The most common types of construction contracts include:

- Time and Materials
- Lump-Sum
- Unit-Price
- Cost-Plus
- Guaranteed Maximum Price

The agreement itself is just the beginning. Construction contracts need as much detail as possible to avoid mistakes, conflicts and delays; which ultimately cost everyone on the project time and money.

General Conditions

General conditions are essentially the framework of the construction contract documents. They provide the “*how*” of the project.

Most importantly, general conditions establish all the rights and obligations of the contracting parties. Additionally, it will lay out the roles of every party and the responsibilities of each.

Any time an issue arises on the project, the game plan on how to proceed is usually found here, amongst a litany of detailed clauses. This includes how change orders are processed, how payment apps are approved and any and all notice requirements that may arise on a job site.

The general conditions will also include all the suspension, termination and alternative dispute resolution procedures.

Special Conditions

This is typically an addition or amendment to the general conditions section. This document will detail the specific clauses and conditions for each task or project. For instance, if there are specific instructions that only apply to one job or portion of the build, they will be included in this document.

Scope of Work

A clearly defined scope of work, also known as a statement of work, is a crucial element of a construction contract. This document will describe, in detail, the precise tasks and objectives of each contractor.

Weygant, Harold J. Rosen, John R. Regener, 2010-04-26 Updated edition of the comprehensive rulebook to the specifier's craft. With this latest update *Construction Specifications Writing Sixth Edition* continues to claim distinction as the foremost text on construction specifications. This mainstay in the field offers comprehensive practical and professional guidance to understanding the purposes and processes for preparation of construction specifications. This new edition uses real world document examples that reflect current writing practices shaped by the well established principles and requirements of major professional associations including the American Institute of Architects (AIA), the Engineers Joint Contract Documents Committee (EJCDC) and the Construction Specifications Institute (CSI). Also included are guidelines for correct terminology, product selection, organization of specifications according to recognized CSI formats and practical techniques for document production. Fully revised throughout, this Sixth Edition includes Updates to MasterFormat 2004 as well as SectionFormat PageFormat 2007 and Uniformat. End of chapter questions and specification writing exercises. Samples of the newly updated construction documents from the AIA. New chapter on sustainable design and specifications for LEED projects. Contract Documentation for Contractors Vincent Powell-Smith, John H. M. Sims, Christopher Lancaster, 2008-04-30 The JCT standard forms of building contract require a thorough understanding of their procedural requirements as well as their legal implications. They require both the contractor and the architect on behalf of the employer to send a wide range of notices and letters if each party is to protect its legitimate interests. The main contract forms are also supported by complex sub contract documentation. Therefore it is not surprising that when this book of specimen letters, notices and forms was first published it was widely welcomed by the construction industry. The book provides examples of documentation likely to be required for a contract under the following JCT forms: the Standard Form of Building Contract, the Intermediate Form of Building Contract, the Agreement for Minor Building Works, the Standard Form of Building Contract With Contractor's Design. It includes a commentary on the practical implications of the various documents and highlights the points to be watched. The new edition takes into account the wide range of amendments to the latest editions of the standard forms following the Housing Grants, Construction and Regeneration Act 1996 and in particular the new payment and adjudication provisions. For the first time it features documentation for use with the JCT design and build form.

The American Institute of Architects Official Guide to the 2007 AIA Contract Documents American Institute of Architects, 2009-03-23 No other contracts are more widely used in the construction industry than the American Institute of Architects standard forms. The American Institute of Architects Official Guide to the 2007 AIA Contract Documents offers unparalleled insight into the AIA's extensive portfolio of contract documents, helping the reader understand the forms and how to implement them. This guide is divided into two parts. Part One, The AIA Standard Documents, examines the role of AIA Contract Documents, their history and how the documents are written and updated. It also reviews the

educational and supporting resources that are part of the AIA's contract documents program Part Two The AIA Documents Companion describes agreements in detail including the purpose and rationale for provisions Separate chapters cover the owner contractor contractor subcontractor owner architect and architect consultant agreements The guide concludes with a chapter describing pivotal legal cases that have helped shape and interpret AIA contracts Samples of the most commonly used contracts are in print in the appendix and an accompanying CD ROM has samples of all AIA Contract Documents in PDF format for Mac and PC computers that released in 2007 as well as the Integrated Project Delivery Family of documents that released in 2008 This book is invaluable for construction project owners attorneys contractors subcontractors design professionals and others involved in the procurement management and delivery of building projects It is also recommended for students and young professionals seeking a degree certification or licensure
