Genre Analysis John M. Swales, John Swales, 1990-11-08 The author looks at varieties of language and considers these in relation to communication and task based language learning *The Linguistics Encyclopedia* Kirsten Malmkjær, 2002 This thoroughly revised and updated volume offers comprehensive coverage of the major and subsidiary fields of linguistic study

Research Genres John M. Swales, 2004-11 This book provides a rich and accessible account of genre studies by a world renowned applied linguist The hardback edition discusses today's research world its various configurations of genres and the role of English within the genres Theoretical and methodological issues are explored with a special emphasis on various metaphors of genre The book is full of carefully worded detail and each chapter ends with suggestions for pedagogical practice The volume closes with evaluations of contrastive rhetoric applied corpus linguistics and critical approaches to EAP Research Genres provides a rich and scholarly account of this key area **Exploring the Dynamics of Second Language**

Writing Barbara Kröll, 2003-04-14 The book addresses issues in the field of teaching academic writing to non native speakers This book provides a series of discussions about multiple aspects of second language writing presenting chapters that collectively address a range of issues that are important to new teachers at the post secondary level The 13 chapters provide scholarly visions insight and interpretation oriented toward explaining the field of teaching academic writing to non native speakers The book is designed to provide foundational content knowledge in this area with each chapter authored by recognized experts in the field In addition to helping train new teachers the book will serve as an updated reference book for practicing teachers and scholars to consult *Genre Analysis* John M Swales, 1990 **Genre Analysis and Economics**

Laura Mureşan, 2000 *Discourse on the Move* Douglas Biber, 2007 *Discourse on the Move* is the first book length exploration of how corpus based methods can be used for discourse analysis applied to the description of discourse organization The primary goal is to bring these two analytical perspectives together undertaking a detailed discourse analysis of each individual text but doing so in terms that can be generalized across all texts of a corpus The book explores two major approaches to this task top down and bottom up In the top down approach the functional components of a genre are determined first and then all texts in a corpus are analyzed in terms of those components In contrast textual components emerge from the corpus analysis in the bottom up approach and the discourse organization of individual texts is then analyzed in terms of linguistically defined textual categories Both approaches are illustrated through case studies of discourse structure in particular genres fund raising letters biology biochemistry research articles and university classroom teaching **Modernizing Legal Education** Catrina Denvir, 2020-01-09 Discusses the skills required by future lawyers and explores innovative and technology driven approaches to modernising legal education **Writing Research Differently**

Margaret Malone, 2024-10-10 Community university engaged research is one of the most important innovations occurring within higher education today Yet the scholarly literature remains largely untouched by these profound shifts To better

understand why and what can be done about it this book focuses its attention on the research article itself a prestigious conventionalised form of writing that helps shape what knowledge is how we know it and for what purposes This highly original book challenges the notion of the empirical research article as neutral that it just is Analysis of a range of texts from the field of engaged research reveals both the dominance of scientific genre conventions and author led strategies to modify adapt and resist them In the final chapters a re imagined research article is proposed While speculative this is an important undertaking offered as critical and practical encouragement for a form of scholarly communication in which social and cognitive justice is not just acknowledged but is present

Lexical Repetition in Text Krisztina Károly, 2002 This book explores lexical repetition and its text organizing function in English written discourse It intends to contribute to three main areas of study It contributes to cohesion analysis by showing that by treating the concept of repetition in a new broader sense lexical cohesion as a whole may be seen in fact as various forms of lexical repetition It also contributes to repetition research because it demonstrates that lexical repetition and the way it clusters in text make a unique contribution to the organizational quality of written discourse Finally it contributes to English written text analysis in that it partly answers a question that has long been bedeviling the science of text whether or not there exists a way to measure subjective intuition objectively This study shows that there is a way to measure subjective intuitive perceptions of discourse quality via objective means that is through the analysis of linguistic elements identifiable on the textual surface Contents The text organizing function of lexical repetition in English written discourse Main schools and advances of product oriented English written text analysis A theoretical grounding for the analysis of lexical cohesion as various forms of lexical repetition A refined version of Hoey s 1991 repetition model **Papers and Studies in**
