

# Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the 2024 Summer Term of Cooling Theory. These are generalised and given according to preference for all of the cooling plans. Some are the generalisation while some are the lecture, the latter contribution to Cooling Theory and the book of *Building and Plant Performance of Green-Growing Spaces*. I also used several other sources for building materials such as Part II course book of *Knowledge on Cooling Theory and Greenhouse* given by Professor John Wilson, and the other course notes from a *Greenhouse Plant for Subtropical Greenhouses* course given by Professor Tim Givoni. I also included some more about solar in 2023 course, *Applied Maths for the Plant Performance*. The last version of the notes is based on Mark Hupfer course notes, "Graph Based Cooling".

All contents by these notes are my work.
