book successfully and reveal all their hidden messages then you are well on your way to being a code breaker extraordinaire. If you get stuck at any point then remember that some of these puzzles are deliberately hard so they will be challenging to solve. It's always worth taking a break and coming back to a difficult puzzle later. There are a wide range of different styles of puzzles to solve in this code puzzle book for children: there are numerical codes, letter codes, symbolic codes, codes hidden in pictures, in word search grids, in crosswords, seemingly random text lists, dots and dashes, famous codes from history and much much more as every puzzle is different. If you get stuck at any point talking to friends and family about a puzzle and solving it in a group can be great fun. The suggested age range for the book is 8-12, although the easy puzzles marked with one star should be accessible to a younger age range perhaps 6, whilst the hard puzzles may prove challenging to teenagers. Therefore the age range 8-12 is just a suggestion as individual abilities vary so much. Here is an example of a two star middle level difficulty puzzle in this code breaking book for kids: this is not one of the actual puzzles from the book but uses the exact same logic as the puzzle in the book so you can get some idea of difficulty. Can you read what it says: FI OY EU JN YO OS VL NI TG IH CS DO TE EH WN TE IH KN OY WU LI EL JN YO HT SI OB KO. We hope you enjoy the puzzles in this book and find solving the codes and revealing their secrets satisfying and fun. All the solutions are included at the back of the book but also a clear explanation of how the answer is achieved. There is nothing more frustrating than seeing an answer but not understanding how it is reached so we give details of the process needed to crack each and every code in the book. Finally we want to say: **HPPE MVDL DPEFCSFBLFS** **Think Like a Coder!** Deanna Pecaski McLennan, Brian Aspinall, 2019-11-14
