### **The Future of Sales in the B2B Software Industry. The Digitalization of Sales in German small and medium-sized enterprises**

Tim Schick, 2023-08-22 Master's Thesis from the year 2022 in the subject Business economics Trade and Distribution grade 1.3 European School of Business Reutlingen language English abstract In addition to an overview of the most relevant trends and the most promising digital methods as well as tools for sales this master thesis will provide insights into the practical aspects of Digital Sales A particular focus will be placed on the relevance and influence of Digital Leadership in the context of necessary change management regarding the digitalization of sales Across all industries digitalization leads to sustainable structural changes for companies of all sizes New business models are emerging existing business models are changing fundamentally or are even disappearing altogether Hardly any business area is spared from disruptive change Therefore also customer management and sales constantly face new challenges and opportunities Familiar processes and methods have to be reassessed radically to ensure ongoing success Companies have to learn to adapt their customer management to changing requirements They cannot hope that customers will continue to move towards providers as they have in the past This has profound consequences for sales Existing processes have to change salespeople have to adapt their skills and competencies to shifting customer expectations and organizations have to review their structures Companies that do not address the digital market changes today will not survive in the future In contrast to U S based companies German companies have been hesitant to deal with the digitalization of sales so far Business was excellent and sales were continuously successful Thus there was little need to change the status quo especially in small and medium sized enterprises SMEs However the COVID 19 pandemic abruptly changed business life The entire sales cycle suddenly needed a redesign from customer acquisition to customer service Ultimately the pandemic began to change sales processes in German SMEs and with that also the mindset towards the digitalization of sales Nevertheless companies are still struggling to change The vast number of options for optimizing sales processes seems unlimited Which sales processes should companies digitize and which should stay as they are Which aspects are critical to the success of effective sales management Who should be the initiator and motivator for digitalization measures in sales Moreover are the necessary skills and competencies even available

**Covenants and Third-Party Creditors** Daniela Matri, 2017-10-17 This book adds to the debate on the effects of covenants on third party creditors externalities which have recently become a focus of discussion in the contexts of bankruptcy law corporate law and corporate governance The general thrust of the debate is that negative effects on third party creditors predominate because banks act in their own self interest After systematising the debated potential positive and negative externalities of covenants the book empirically examines these externalities It investigates the banks factual conduct and its effects on third party creditors in Germany and the US The study's most significant outcome is that it disproves the assumption that banks disregard third party creditors interests These findings are then interpreted with the

tools of economic analysis particularly with the concept of common pool resources CPRs Around the aggregated value of the debtor company s asset pool as CPR exists an n person prisoner s dilemma between banks and third party creditors No creditor knows when and under what conditions the other creditor will appropriate funds from the debtor company s asset pool This coordination problem is traditionally addressed by means of bankruptcy law and collaterals However the incentive structure that surrounds the bilateral private governance system created by covenants and an event of default clause a CPR private governance system is found to also be capable of tackling this problem Moreover the interaction between the different regulation spheres bankruptcy law collateral and the CPR private governance system has important implications for both the aforementioned discussions as well as the legal treatment of covenants and event of default clauses Covenants alone cannot be seen as an alternative to institutional regulation the complete CPR private governance system and its interaction with institutional regulation must also be taken into consideration In addition their function must first find more acceptance and respect in the legal treatment of covenants and event of default clauses The CPR private governance system fills a gap in the regulation of the tragedy of the commons by bankruptcy law and collateral This has particularly important implications for the German 138 BGB 826 BGB and ad hoc duties to disclose insider information

**International E-Business - Building Online Customer Loyalty with Relationship Management** Wolfgang Katsch, 2008-02 Diploma Thesis from the year 2001 in the subject Business economics Customer Relationship Management CRM grade very good University of Innsbruck Institute for Corporate Leadership language English abstract 1 1 Problem Statement For many years successful neighborhood merchants restaurants and pubs had real customer relationships They knew their customers personally understood what they wanted and as best they could satisfied their needs through personalized service As a result they earned loyalty and a large share of their customers business Some of the best examples of building customer loyalty can be found in those traditional small businesses Now the question arises how customer relationships can be built in the world of E Business E Business the buying and selling of products and services over the Web and its impact is comparable with the industrial revolution at the end of the last century After hysteric times of E Business startups and well known bursting bubbles the point of disillusion has come

Some internet companies recognize that traditional business concepts are not necessarily outdated. Acquiring customers on the international marketplace of E Business is enormously expensive and unless those customers stick around and make lots of repeat purchases over the years profit will remain uncertain. For lasting success companies have to intensify their efforts towards customer loyalty and customer relationship management. Without loyalty even the best designed E Business model will collapse. This leads to the following objective:

1.2 Objective: The objectives of the thesis are to combine the concept of customer loyalty with the characteristics of E Business show how companies can build loyalty with customer relationship management.

1.3 Relevance of the Topic

1.3.1 Theoretical Relevance: Concerning E Business there exists plenty of literature mainly from a technical point of view. The drawback is that although loyal *Wet Feet Insider Guide 25 Top Consulting Firms*, 2008 Progress in Production Engineering Jens P. For retailers this behavior can be a major opportunity or threat. To give insights into the phenomenon the thesis aims to determine a channel attributes that encourage or deject customers from attending showrooming and b how customer characteristics distinguish showrooming customers from customers who did not purchase online. An empirical study collected data of 334 respondents via an online questionnaire. 149 showroomers and 185 respondents who did not showroom during a recent product purchase were compared regarding their perceived difference of channel attributes in the offline and the online channel. Further both groups were compared in various customer characteristics. The results of the binary logistic regression reveal that among all observed channel attributes the difference in price service purchase convenience enjoyment and risk perception between the online and offline shop have a significant impact on the likelihood of showrooming whereas the assortment and after sales services did not show significant impact. Among the observation of customer characteristics a positive attitude towards free riding towards shopping and retailer loyalty were found to have a significant impact on the showrooming likelihood. The internet experience and the level of price consciousness showed no significant impact. With the results the thesis supports physical retail stores to adjust the design of channel attributes in order to avoid showrooming behaviors of their customers. It also helps retailers to identify customers that are more likely to attend showrooming and target them specifically to prevent them from attending showrooming **Automotive System Integrators: Spiders or flies in the e-Business web?** ,
