

## Supermarket Management System

### Chapter 1

#### Introduction

##### 1.1 Introduction:

**Supermarket management system** is the system where all the aspects related to the proper management of supermarket is done. This project is based on the sales transaction and billing of items in a supermarket. The first activity is based on adding the items to the system along with the rate which are present in the supermarket and the name of the items which the supermarket will agree to sell. This authority is given only to admin (administrator). Any modifications to be done in the item name and the rate can be done only by admin. He also has the right to delete any item. As the customer buys the products and comes to the billing counter, the user is supposed to enter the item name he purchased and the quantity of the item he had purchased. This is not a huge a task.

These aspects involve managing information about the various products, cashier, purchased products and sale it, billing etc. This system provides an efficient way of managing the supermarket information. This project is based on the sales transaction and billing of items in a supermarket. The first activity is based on adding the items to the system along with the rate which are present in the supermarket and the name of the items which the supermarket will agree to sell. This authority is given only to admin (administrator). Any modifications to be done in the item name and the rate can be done only by admin. He also has the right to delete any item. As the customer buys the products and comes to the billing counter, the user is supposed to enter the item name he purchased and the quantity of the item he had purchased.

##### 1.2 Objectives:

1. The objective of the "Supermarket Management System" is to produce software which manages the sales activity done in a supermarket, maintaining the stock details, maintaining the records of the sales done for a particular month/year.
2. The users will consume less time in calculation and the sales activity will be completed within a fraction of seconds whereas manual system will make the user to write it down which is a long procedure and it also consumes a lot of time.
3. The data will be stored in the database.
4. Because of this software, paper work will be reduced and the user can spend more time on the monitoring the supermarket.
5. To store large amount of data in the database which will reduce clumsiness.
6. The project will be user friendly and easy to use.

##### 1.3 Problem Definition:

One kind of retail business is supermarket. Supermarket is also a market that has the characteristic of intense competition with high turnover rates and poor margins, every transaction counts. The supermarket management system provide easy to access to increase the stores effectiveness.

To design a computerised supermarket management system to ascertain stock level of supermarket, when to order for more goods, keep status and update of transaction, thereby helping progress level, stock taking and managerial decision.
