East Asia Hugh Dyson Walker, 2012-11-20 Histories of East Asia traditionally emphasize China and Japan and neglect Korea and Vietnam Essentially 20th century East Asia is re written into the past as though China and Japan was always the core of East Asian development This is not at all how East Asia developed Chinese prehistoric cultures became historic in the 18th century B C Japan was not part of East Asia for over 2300 more years By studying periods of Chinese unity and disunity and their effects on Chinas neighbors Korea and Vietnam a distinct culture zone East Asia gradually emerged and slowly included Japan The main elements of East Asiacultural social political

philosophical religious and linguistic were derived from China but the others were not minor replicas of China Each was unique its people ethnically distinct from China and each other its native language and linguistic blend with Chinese also unique Korea and Vietnam resisted Chinese colonization but adopted and adapted advance Chinese elements to their own needs Emerging later Japan underwent wholesale adoption of Tang Chinas advances replicated in the 19th century when Japan was the first East Asian country to modernize Spanning some thirty eight centuries from the 18th century B C to 2012 A D this diversity with common elements derived from China is a major theme of this work It is often overlooked by those who prefer general views based on surface impressions to more complex realities The former often lead to mistakes the latter become the basis for more sound understanding After all these four countries and people share the eastern end of the Eurasian continent yet each countrys geographic situation is also unique As the twenty first century continues to unfold this new approach to East Asia should help to produce clearer and more accurate understanding of this important world region

Holcombe,2017-01-11 Charles Holcombe begins by asking the question what is East Asia In the modern age many of the features that made the region now defined as including China Japan Korea and Vietnam distinct have been submerged by the effects of revolution politics or globalization Yet as an ancient civilization the region had both an historical and cultural coherence This shared past is at the heart of this ambitious book which traces the story of East Asia from the dawn of history to the twenty first century The second edition has been imaginatively revised and expanded to place emphasis on cross cultural interactions and connections both within East Asia and beyond with new material on Vietnam and modern pop culture The second edition also features a Chinese character list additional maps and new illustrations

Science and National Consciousness in Bengal J. Lourdasamy,2004 This book gives a flavour of the Indian response to modern science by analysing the lives and careers of four scientifically influential personalities in Bengal His analysis of the careers of two scientists J C Bose and P C Ray and two institution builders Mahendralal Sircar and Asutosh Mookerjee brings to light the issues related to science at a time of colonialism and nationalism Scientists often had to depend on British institutions for legitimation and funding while also supporting the nationalist cause for greater autonomy One of the central claims of this book is that the protagonists aimed to contribute to a modern world science one based on a strong sense of universalism They did not aim to construct any alternative sciences though they did express and apply their work by drawing on their cultural heritage This makes Science and National Consciousness a work of particular relevance today when a homogenous instrumentalist and totally Western conception of science is being globally accepted
