is the difference between a wink and a blink The answer is important not only to philosophers of mind for significant moral and legal consequences rest on the distinction between voluntary and involuntary behavior However action theory the branch of philosophy that has traditionally articulated the boundaries between action and non action and between voluntary and involuntary behavior has been unable to account for the difference Alicia Juarrero argues that a mistaken 350 year old model of cause and explanation one that takes all causes to be of the push pull efficient cause sort and all explanation to be prooflike underlies contemporary theories of action Juarrero then proposes a new framework for conceptualizing causes based on complex adaptive systems Thinking of causes as dynamical constraints makes bottom up and top down causal relations including those involving intentional causes suddenly tractable A different logic for explaining actions as historical narrative not inference follows if one adopts this novel approach to long standing questions of action and responsibility

Competition Policy and Patent Law under Uncertainty Geoffrey A. Manne, Joshua D. Wright, 2011-06-13 The regulation of innovation and the optimal design of legal institutions in an environment of uncertainty are two of the most important policy challenges of the twenty first century Innovation is critical to economic growth Regulatory design decisions and in particular competition policy and intellectual property regimes can have profound consequences for economic growth However remarkably little is known about the relationship between innovation competition and regulatory policy Any legal regime must attempt to assess the trade offs associated with rules that will affect incentives to innovate allocative efficiency competition and freedom of economic actors to commercialize the fruits of their innovative labors The essays in this book approach this critical set of problems from an economic perspective relying on the tools of microeconomics quantitative analysis and comparative institutional analysis to explore and begin to provide answers to the myriad challenges facing policymakers
