Biomass Gasification In India:

Development of Biomass Gasification Technology in India Willem Christiaens,2010-09 This work analyses the development of biomass gasification in India where it takes off with presenting brief historical narrative of past experiments and commercial installations The analysis adopts the framework of Strategic Niche Management in its analysis and applies it to draw conclusions on the past and future development of the technology With the high expectations on the technology s applicability after the first lab scale experiments hundreds of small scale gasifiers where deployed throughout rural India with mixed success Previous expectations proved wrong and new applications for the technology where sought The technology demonstrated to be easier to use in the Industrial setting where it competed with diesel fired burners that gradually became expensive to operate due to increasing fossil fuel prices Also other niches where found for the technology to work in successfully such as crematoria The research is partially based on an 8 month field study where over 40 stakeholders have been interviewed and gasifier installations have been visited *Sustainable Biofuels Development in India* Anuj K. Chandel,Rajeev K. Sukumaran,2017-03-14 This book will provide assistance to the broad range of readers involved in the crude oil import and production renewable energy production biomass analysis and bioconversion greenhouse gas emissions techno economic analysis and government policies for implementing biofuels in India This book presents important aspects on the large scale production of biofuels following a bio refinery concept and its commercialization and sustainability issues Hence it is a useful resource to policy makers policy analysts techno economic analysts and business managers who deal with commercialization and implementation of bio based energy and other value added products The following features of this book attribute its distinctiveness As a first uniquely focused scientific and technical literature on bioenergy production in the context of India To its coverage of technological updates on biomass collection storage and use biomass processing microbial fermentation catalysis regeneration solar energy and monitoring of renewable energy and recovery process To the technical policy analysis climate change geo political analysis of bioenergy and green transportation fuels at industrial scale *Advanced Biofuels* Kalam Abul Azad,Mohammad Rasul,2019-06-09 *Advanced Biofuels Applications Technologies and Environmental Sustainability* presents recent developments and applications of biofuels in the field of internal combustion engines with a primary focus on the recent approaches of biodiesel applications low emission alternative fuels and environmental sustainability Editors Dr Azad and Dr Rasul along with their team of expert contributors combine a collection of extensive experimental investigations on engine performance and emissions and combustion phenomena using different types of oxygenated fuel with in depth research on fuel applications an analysis of available technologies and resources energy efficiency improvement methods and applications of oxygenated fuel for the sustainable environment Academics researchers engineers and technologists will develop a greater understanding of the relevant concepts and solutions to the global issues related to achieving alternative energy application for future energy security as

well as environmental sustainability in medium and large scale industries Fills a gap in the literature on alternative fuel applications with in depth research and experimental investigations of different approaches technologies and applications Considers the important issue of sustainability using case studies to deepen understanding Includes energy security within various industries including aviation and transport Green Buildings and Sustainable Engineering Harald Drück,Jyotirmay Mathur,Varghese Panthalookaran,V. TERI Energy Data Directory Yearbook or TEDDY is an annual publication brought out by TERI since 1986. TEDDY is often used as a reference in other peer reviewed books and journals for energy and environment related data. It gives an annual overview of the developments in the energy supplying and consuming sectors as well as the environment sector. It also provides a review of the government policies that have implications for these sectors of the Indian economy. The book provides extensive data collated from the various government ministries on the energy supply sectors including coal and lignite, oil and gas, power and renewable energy sources and technologies, energy demand sectors namely agriculture, industry, transport and domestic sectors along with information related to environment and climate change. Graphs and maps have been used extensively to explain facts that makes the book an interesting read. Besides detailed tables have been provided at the end of each chapter making TEDDY a comprehensive data book. Each edition of TEDDY contains India's commercial energy balances for the past four years that provide comprehensive information on energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable ready reckoner for anybody working on energy and related sectors. This is the 25th anniversary edition of the book and a number of refinements have been made in the content and presentation to reflect the changing needs of the readers. At the same time care has been taken to ensure that continuity of information is preserved so that researchers can study the trends over time in the energy sector.

Ecologically Sound Integrated Regional Energy Planning T. V. Ramachandra, 2003. The main objective of this book is to develop an Ecologically Sound Integrated Energy Plan at district level to arrive at an optimal mix of energy sources that can meet the energy demand in a region by keeping in view the development priorities of the region. The book presents a conceptual design for energy systems which could meet demand of all sectors in a region. The proposed design in principle supplies enough energy for the sustainable development of a region. The plan proposed is based on the Decision Support System approach DSS and is flexible, adaptable and ecologically sound.
