Missing the Mark Dennis Sherwood, 2022-08-04 UNCOVERED 1 in 4 EXAM GRADES IS WRONG An important contribution to our thinking Sixth Form Colleges Association An uncomfortable but important read Headmasters and Headmistresses Conference Everyone in UK education should reflect upon the problems identified in this powerful book Higher Education Policy Institute Every summer in Britain one million GCSE and A Level candidates receive results that define their school years and set them up for their life But those results are gravely unreliable In fact about one grade in four in England is WRONG That is 1.5 million grades every year An A Level grade B might have been an A or even a C had a different examiner marked the script Similarly a GCSE grade 7 might have received a grade 8 or a 6 For a decade young people and their friends and families have been unable to grasp the full extent of this randomness Now in this definitive and easy to follow book Dennis Sherwood explains why so many pupils receive final grades that don't do them justice And he suggests ways to regain trust which apply to essay based exams throughout the world

Reviews Know an A Level student who you were absolutely sure should nail an A but ended up with a B Well they probably should have got that A but were a victim of this scandal Sherwood's work changed my outlook Let him change yours too Robert Campbell former Chief Executive Morris Education Trust Dennis has been challenging our thinking about assessment and the awarding of grades for many years combining detailed research with an engaging manner and clear explanations this is an important contribution to our thinking Bill Watkin Chief Executive Sixth Form Colleges Association Dennis Sherwood asks the questions about exam grades that no one really wants to answer His analysis suggests that much of what we think we know about school exams is based at best on wishful thinking and at worst on wilful misrepresentation of statistics But he also has some positive suggestions for improvement

Missing the Mark is an uncomfortable but important read Melvyn Roffe Chair Headmasters and Headmistresses Conference Missing a grade can result in university or college applications being rejected Dennis Sherwood asks the 64 000 question Are grades reliable enough for the purposes they are supposed to serve This book presents an insightful analysis of this important matter including the rules introduced in 2016 to reduce the number of appeals the controversial grading processes in 2020 and 2021 when exams were cancelled why real grades are so unreliable and some solutions too Huy Duong parent Everyone in UK education should reflect upon the problems identified in this powerful book

and then decide what to do about them Nick Hillman Director Higher Education Policy Institute Anyone with an interest in how examinations are assessed from those in government regulators schools colleges universities to employers teachers parents and students should read Dennis Sherwood s incisive analysis His conclusions will have a profound impact on our idea of the accuracy reliability and fairness of examinations Mike Larkin Emeritus Professor Queen s University of Belfast and Total Equality For Students Dennis provides a clear step by step outline of what is going so terribly wrong and the easy ways to remedy this Ollie Green A level student About the author Dennis Sherwood is a management consultant with experience of solving complex problems He has a Physics Masters from the University of Cambridge an MPhil in Molecular Biophysics and Biochemistry from Yale University and a PhD in biology from the University of California in San Diego After being a consulting partner at Deloitte Haskins Sells and Coopers Lybrand he became an executive director at Goldman Sachs He now runs his own business specialising in organisational creativity and innovation He is author of 14 books The Europa World Year Book 2004 Taylor & Francis Group,2004-06 Covering over 250 countries and territories the 2004 edition provides detailed country surveys that contain the latest analytical statistical and directory data and remains an indispensable source of information on worldwide affairs Volume I contains a comprehensive listing of over 1 650 international organizations such as the United Nations the European Union and NATO and provides details of countries arranged alphabetically from Afghanistan to Jordan Volume II covers countries from Kazakhstan to Zimbabwe **Talking Politics** ,1994 **The Europa World Year Book 2002** Europa,2002 First published in 2002 Routledge is an imprint of Taylor Francis an informa company **British Book News** British Council,1993 Includes no 53a British wartime books for young people *Resources in Education* ,1996-05 **British Qualifications** ,1999 **Learning to Teach in the Secondary School** Susan Capel,Marilyn Leask,Sarah Younie,2016-03-17 Learning to teach involves hard work and careful preparation To become an effective teacher requires pedagogical and subject knowledge an understanding of your pupils and how they learn and the confidence to respond to dynamic classroom situations Learning to Teach in the Secondary School is the market leading text for all undergraduate postgraduate and school based routes to qualified teacher status It offers an in depth and practical introduction to the knowledge skills and understanding needed to become a confident and effective teacher With a focus on evidence based practice the book includes a wealth of examples to demonstrate how to successfully apply theory to practice and how to critically analyse your practice to maximise pupil learning This 7th edition is fully updated in light of the latest initiatives evidence and research in the field offering comprehensive coverage unit by unit of the key concepts and skills addressed on initial teacher education courses in preparation for work in schools The wide range of pedagogical features support both university based work including that up to Masters Level and school based initial teacher education and are designed to help you develop those qualities that lead to good practice and a successful future in education Written by expert practitioners thirty six essential units include adopting a positive approach to managing
