of social work education and practice The authors of each piece in this collection indicate progress in developing an empirically based approach to social work practice Despite the impressive documentation contained in the present volume no conclusive evidence as to the effectiveness of behavioral methods exists What behavioral methods do offer however is a systematic format for both problem intervention and evaluation that over time should produce a more empirically based practice A promising sign well documented in the present effort is the facility with which this book has subjected practice procedures to the rigor of research and evaluation This blending of clinical practice and research develops the sense of competence that student practitioners acquire in understanding and controlling both the art and science of their clinical practice Steven Schinke and his colleagues offer a series of snapshots of important work in process Their collective portrait provides a fresh perspective and new stimulus for all social work practice as well as an affirmation that disciplined responsive and sensitive social work intervention can make a difference in the lives of people
