Genetic Engineering and Genome Editing for Zinc Biofortification of Rice B.P. Mallikarjun Swamy,Anca Macovei,Kurniawan Rudi Trijatmiko,2023-06-23 Genetic Engineering and Genome Editing for Zinc Biofortification of Rice provides the first single volume comprehensive resource on genetic engineering approaches including novel genome editing techniques that are carried out in rice a staple crop for much of the world s population Dietary zinc deficiency can lead to negative health outcomes including increased risk of stunting respiratory diseases diarrhea mortality during childhood and preterm births in pregnancy By providing a complete view of the need for zinc biofortification in rice sections in this book discuss state of the art scientific advances and then go further placing them in their proper scientific regulatory and socioeconomic contexts While zinc biofortification can be achieved through conventional breeding genetic engineering and agronomic practices this is the first reference to bring all the latest insights and understanding to a comprehensive resource that is based on real world experience and targeted applications Compiles the state of the art information to allow fast track understanding and application of zinc content improvement Discusses multiple strategic and methodology approaches Includes discussion of the socioeconomic implications of improved rice nutritional value

There are many guidelines protocols and advisories that outline how biosafety and biosecurity can be adopted by institutions around the world Whilst helpful many of these are tailored to affluent Western nations This leaves developing nations far behind since their laboratories and institutions are resource scarce and biosafety and biosecurity are not mainstreamed entirely among the different laboratory workers healthcare professionals researchers and academics Biosafety and Biosecurity Practical Insights and Applications for Low and Middle Income Countries aims to bridge this gap by comprehensively summarizing the state and development of biosafety and biosecurity in developing and developed nations in a comparative analysis This book includes basic concepts and principles of biosafety and biosecurity including certification and legal frameworks both international and local and biosafety and biosecurity across disciplines including environmental medical and special topics that are relevant to countries with comparable conditions This proposed book solves the problem of the lack of a prescribed professional title that comprehensively summarizes the state and development of biosafety and biosecurity throughout the world allowing the reader a 360 view of the subject area This book will appeal to a global audience of biorisk officers health and safety professionals and specialists in the life sciences health and allied fields environmental science engineering and plant and animal agriculture
