Corporate Restructuring Lessons From Experience:

Corporate Restructuring Michael Pomerleano, William Shaw, 2005 In light of the periodic financial crises of the late 1990s there has been a growing recognition of the need for a strategy to avoid and mitigate the severity of crises in the corporate sector requiring the complementary efforts of policymakers regulators lawyers insolvency experts and financiers This publication examines the issue of corporate restructuring drawing on case studies of corporate crises in Indonesia Korea Malaysia and Thailand among others and discusses a range of topics including the key role of governments in securing an enabling legal system effective out of court workouts supportive tax regimes policy and regulatory initiatives to address systemic corporate problems *Macro-Financial Implications of Corporate (De)Leveraging in the Euro Area Periphery* Ms. Manuela Goretti, Mr. Marcos Souto, 2013-06-26 High corporate indebtedness can pose an important threat to the adjustment processes in some of the Euro area periphery countries through its drag on investment as well as the possible migration of private sector losses to the sovereign balance sheet This paper examines the macroeconomic implications of corporate debt overhang in recent years confirming empirical evidence in the literature on the relationship between a firm s balance sheet position and its investment choices especially beyond certain threshold levels Building on an event study of past crisis experiences with corporate deleveraging it also discusses the expected macro financial impact of the ongoing deleveraging processes in these countries presenting available policy options to facilitate an orderly balance sheet adjustment and support a return to productivity and growth In Good Times Prepare for Crisis Ira Lieberman, 2018-10-09 Sovereign debt crises are a little like the weather One can get ready to endure them and maybe take some steps to lessen their impact but so far it hasn t been possible to prevent them Like the weather they just keep happening That s the overriding thesis of this book tracing the major debt crises of the past century starting with the Great Depression and running through the recent Great Recession Written by a former World Bank expert on debt crises this book discusses best practices for how such crises can be resolved As the painful experience of the past decade reminded everyone frequent debt crises and defaults do great damage to economies and cause vast personal hardship But resolving them has proven difficult both economically and politically and has taken time almost always requiring a lender of last resort such as a country s central bank or the International Monetary Fund Too often efforts to end debt crises have been little more than a palliative and the debt overhang from one crisis contributes to the next as illustrated by the ongoing saga in Greece Both private and sovereign debts have increased substantially since the 2008 crisis with inadequate deleveraging This debt overhang leaves countries vulnerable and with limited maneuverability to address the next crisis This book does not pretend to describe how debt crises can be prevented But it does draw useful lessons from recent crises that can help economists bankers policymakers and others resolve the inevitable future crises with the least possible damage Portugal International Monetary Fund. European Dept., 2013-01-18 Portugal s economy is in deep recession and the crisis has opened up a large

output gap with severe consequences for employment and government revenue While the focus is on the medium and long term this analysis also offers insights on how deep the output gap is It also highlights ways in which policies and reforms can promote growth over the longer haul and suggests that achieving a 2 percent growth rate over the long term consistent with moderate convergence growth is a realistic objective **Spain** International Monetary Fund. European Dept.,2014-07-10 This Selected Issues paper analyzes Spain s sustainable growth rate It sheds some light on Spain s medium term growth prospects by looking into the key factors driving potential growth both in the past and likely in the future and international experience of countries in the aftermath of financial crisis The paper suggests Spain is likely to face a long period of moderate growth about 1 2 2 percent and high unemployment but policy action especially that directed toward reducing structural unemployment and raising productivity could lead to much better outcomes *Corporate Restructuring* ,2001

Experience of Asian Asset Management Companies Akiko Terada-Hagiwara,Gloria Pasadilla,2004 **China** World Bank,1999 This report builds on the framework laid out in the 1997 Country Economic Memorandum China 2020 Development Challenges in the New Century and its companion reports which remain largely valid This report focuses on the near term The difficulty of dealing with China s main macroeconomic challenge weakened domestic demand has been compounded by the Asia crisis and the global economic slowdown These challenges come at a critical juncture in China s structural reform program Unemployment and demand for social protection has increased and corporate debt pressures are building in line with the transition to a more market based economy However the country s large and partly insulated domestic economy has inoculated it to some degree against contagion from its less fortunate neighbors Having weathered

the storm so far China can learn lessons from other countries that have experienced difficulties and hence mitigate against the risk of a crisis The major policy issue for China is how to respond to near term growth pressures in ways that reinforce structural reform and economic development Policymakers have to focus on pro growth reforms that support the development of the labor absorbing service sector Also enterprise restructuring and corporate governance strengthening must remain high priorities Finally China needs to support structural measures that increase household demand by raising rural incomes and supporting safety net programs
